Mr. D. Hall, Contractor,
Cotton Exchange Building,
City.

RE: NEGRO HOSPITAL BUILDING.

Dear Sir:

Because of the advent of natural gas into Houston, it will be necessary to put in some vent connections for the stoves in the Diet Kitchens. Will you please give me a figure on this, using commom 5" leader pipes and elbows?

Two different ways might be used for these connections. Either to go into the elevator shaft and up in the corner of same and through the roof, or to go up the outside wall in the shape of a downspout and carry it to and through the main gutter.

Your attention to this matter will be appreciated.

Yours very truly,

6
