CANTON, OHIO, U. S. A.

Stamped Metal Ceilings.

Elegant Designs—The Most Durable and Handsome Ceilings in Use.

WE wish to call the attention of Architects, Builders, Contractors and Business men to the use of Sheet Steel as an inside finish for Ceilings, Wainscoting, Etc., and all interior decorations. This material, made up in appropriate designs, is fast supplanting the old fashioned lath, plaster and wood ceilings. It possesses the very essential advantages of beauty, durability and fire-proof qualities. We are producing some very handsome designs, which are comparatively inexpensive.

They are suitable for all kinds of buildings, such as storerooms, factories, offices, asylums, hospitals, churches, colleges, schoolhouses, etc. They supply a much needed want in building material, in places where plastered ceilings are unsuitable on account of their cracking and falling off, and liability to become detached by motion of machinery, or any other cause that produces jarring or concussion upon the floor above. But, over and above these, are their intrinsic value as a fire-proof protection against the spread of fire in a building.

We fit these ceilings up for any sized room, when accurate drawings and measurements are sent us. The drawings must show all angles and offsets in the ceiling, also all chandeliers and drops.

To Architects, Contractors and Builders:

We take pleasure in presenting you with a copy of the Architects and Builders' Edition of our Catalogue, in compiling which we have endeavored to show the desirable features and superiority of Stamped Metal work over the old style plaster and wood finish; the former being not only inartistic, but absolutely dangerous, especially in public buildings of all kinds and business blocks, while the latter cannot be made attractive at any moderate cost, and besides, affords no protection against the spread of fire.

We have been able to show only a very limited number of designs into which these goods can be formed. We are constantly increasing our line, and it should be borne in mind **that we can supply anything in this line of work**, and will be pleased to submit estimates at any time on any special designs. Almost all of the combinations shown can be changed to suit the wishes of our customers by substituting other fillers, mouldings, etc., with very little, and in many cases no additional cost, and many new combinations can be formed by the proper arranging of the different sets of panels, etc.

We trust this book will merit a place in your files, and that we can interest you in these goods to our mutual advantage. **We offer special inducements** to those in position to specify our goods.

Respectfully,

J. H. ELLER & COMPANY.

How to Order.

IN ordering, it is absolutely necessary that a diagram with exact measurements be sent; all offsets, angles, etc., must be shown, and also all chandeliers and drops from ceilings; also state how far down on side wall you wish cove to extend, and where intended for storerooms, **state whether cove can be used over large front windows. To ascertain the exact cost, measure the surface to be covered, and add whatever distance cove and foot mould are to extend down on the walls.** Our prices include necessary wood brackets for cove and moulding, also nails for applying, but no center pieces unless otherwise stated. Wood furring strips are not included, except where so specified, as many persons prefer to furnish their own strips, and besides when rooms are ceiled with boards no strips are required, except for deep paneled ceilings.

It is frequently necessary to change catalogue designs somewhat by adding fillers or borders in order to fit room properly and avoid cutting of panels.

Center pieces are never included except where stated, without being charged for extra.

All ceilings are coated with one good coat of light colored paint.

It is not necessary to remove the plaster from old buildings; secure the furring strips with longer nails than would otherwise be used. We furnish plan and directions with each ceiling. Too much care cannot be taken in putting up ceilings. They must be put up in accordance with the **Blue Print** and in a neat and mechanical manner, otherwise their beauty and effectiveness will be very much lessened. No matter how fine the pattern or design may be, unless it is properly and neatly put up, with all joints or laps fit up close and every mould in perfect line, the effect will be bad.

On **receipt of goods,** open all packages and check off **every item,** so as to be **sure** the number of pieces and **everything is complete** as per specifications sent with invoice.

All Claims for shortage must be made **at once on receipt of goods,** and **before** work of putting on ceiling is **commenced,** otherwise they **will not be considered or made good.**

Terms.

Net cash in 60 days, or 2 per cent. off if paid in 10 days from date of invoice. Parties not rated by Commercial Agencies must give references from whom satisfactory reports must be received, or furnish approved security; where this is not done, Bill of Lading will be sent attached to Sight Draft through nearest Bank. Bills not paid promptly when due are subject to Sight Draft without notice.

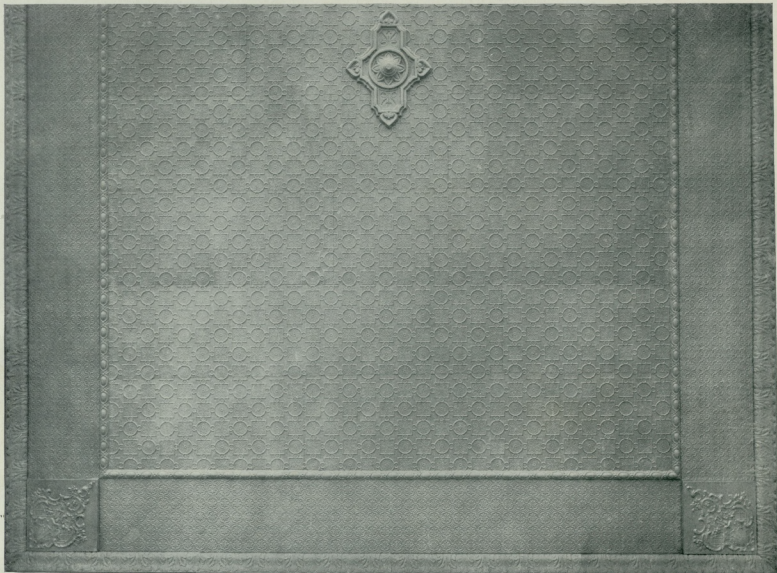

In no case will accounts be permitted to run past maturity without settlement, either by cash or note with interest. Positively no claims will be allowed unless made immediately on receipt of goods.

We guarantee prompt attention to all orders, but cannot be responsible for delays from causes beyond our control. We do not insure deliveries within any specified time, as we cannot control the action of Railroad Companies. We always use every effort to prevent delays in transit, but our responsibility ceases when transportation company receipts for goods in good order.

Orders given to salesmen are taken subject to our approval.

Very truly yours,

J. H. ELLER & CO.
