ON SCHEDULE

Credit Union Board President Johnny Garrison, process manager, Aromatics East, reports construction of the organization's new building is on schedule. Occupancy of the new structure, which is located on 13th Street just east of Center and the 13th Street intersection, will hopefully occur in May.

Concerning loans at the credit union, Garrison also explained, "Due to the continuation of the high money market, our lending policy on loans has been changed. Automobiles now require a 25 percent down payment, effective December 1979."

THOUGHTFUL BOSS

The ladies in General Services are still beaming as the result of a thoughtful gesture by their boss, Lou Boudreaux. Several of them have called this office to express their appreciation to Lou for the gorgeous, long-stemmed roses (one to a customer) he gave them for Valentine's Day.

LATEST WINNER

Our latest jacket winner is Patricia Burnett of Data Processing, who scored with last Thursday's lucky number of 812. Today's lucky number is 912. If you have this badge number, you can register for your prize at either the chemical or main refinery guard house.

AROMATICS RECORD

Aromatics-West has broken the one-day total aromatics production record (benzene and toluene) four times in less than a one-month period in January and February. The Aromatics-West personnel did an excellent job and are to be congratulated. However, the records could not have been broken without the high-quality BEU feed produced by the people at HT-II and the excellent feed received by ACU which is the result of a fine job by the CR-3 and Distilling Unit personnel.
