

August 17, 1927.

Mr. Lee Rogerson,
908 Truxillo Ave.,
City.

Dear Sir:

Transmitted herewith is a copy of a report Mr. Dalton has made the writer on the hook-up for the high pressure sterilizer at the Houston Negro Hospital. Mr. Dalton is apparently under the impression that you connected the sterilizer equipment which, of course, is not so. However, in so far as this report covers the work in your original specification, I would like to have you look into same and correct it according to the report. I am enclosing herewith a type written copy of the specifications regarding this part of the work.

Yours very truly,

MJS:P
