Mr. M. J. Sullivan, Architect
 Second National Bk. Bldg.
 Houston Texas.

Dear Sir:

Referring to the enclosed one day report on car of cement to be used on the Negro Hospital by Den Hall, Constructor, we beg to advise that this car of cement was diverted from Howard G. Fields stock to this job, therefore we were unable to sample this car before it left the mill, however the contractor notified us yesterday that the cement was on the job and we immediately took a sample and started tests on same.

This is an explanation of why this report is several days late in getting to your office. All future shipments to this job will be handled in the regular way and the one day reports will reach your office before the cement reaches the job.

Yours very truly

Southwestern Laboratories
