"THE EVER CHANGING SKYLINE"

Houston Tuberculosis Hospital,
March 21st 1933.

Mr. J.S. Cullinan,
Petroleum Building,
Houston, Texas.

Dear Mr. Cullinan:-

It is interesting to know the splendid co-operation you are receiving from the City of Houston Street and Bridge Department in the repair and upkeep of the drives adjacent to the Houston Negro Hospital, and the continued service assured to further the cause of the most unusual philanthropical gift for the care and uplifting of the negroes of the city and for the welfare of the entire citizenship.

I want to thank you for your kind and complimentary expression for the management of the Autry Memorial Hospital School. It is most gratifying and encouraging to merit the recognition of one so able to differentiate efforts of earnest endeavor rather than mere hospital routine.

I also want to thank you for the privilege of reading the articles in the Journals of the Royal Society of Arts. I am especially interested in source chemistry and the use of food products, and for several years studied that science at Loyola University. I am copying many valuable paragraphs from the journals for reference notes and feel most fortunate to have quotations from recent researches of renowned scientists.

Sorry to have missed Miss Cullinan when she visited the Autry Memorial Hospital School, when I return the journals I hope to have the pleasure of seeing my several friends of the Cullinan family and not forgetting dear little Lucy.

With many thanks for all your kind remembrances,

Very sincerely

*Anna
