

SHELLEGRAPH

HOUSTON
REFINERY

No. 150

Friday, September 17, 1965

SEEING IS BELIEVING....to twelve members of the Refinery United Fund Committee who came home believers after visiting four UF agencies last Thursday; top L, shows A. G. Davenport (center) and J. C. Baumbach with a youngster at the Cerebral Palsy Treatment Center; and top R, at the Lighthouse for the Blind, J. C. Baumbach, L. W. Garner, and R. R. Crawford watch a specialty craftsman at work. Bottom L, shows Shellmen B. W. Farmer, C. S. Matney, and A. G. Davenport 2nd, 3rd, and 4th, from L; discussing the repair of salvageable materials with Goodwill Industries' repairmen; and lower R, watching a Salvation Army chef in the Harbor Light Center prepare the evening meal are: C. S. Matney, A. G. Davenport, and E. O. Kindschy.

FACE TO FACE WITH HEARTACHES OF OTHERS, REFINERY COMMITTEE RETURNS FROM FIELD TRIP DETERMINED TO HELP

"Does he feel much pain....will he walk again....how can a blind girl operate a switchboard....how does he do that with one arm?....and so on. These questions were only a few posed by Refinery UF Committeemen during their tour of the UF agencies last week.

In the words of veteran UF campaigner, K. W. Henry, "No number of repeat visits can completely cushion the pathetic sight of a palsied child, a friendless sick man in his seventies, or a young woman who is

(Cont'd. p.3)

BIKES ARE OUT SO PLEASE LOOK

It's school time all over our area, and we are asking you to pay special attention around the school zones now that the little ones are crossing the streets there, many of them for the first time.

But the one thing we haven't mentioned nearly enough is bicycles.

The youngsters on bikes present more hazards, usually, than the boys and girls crossing the streets near their schools.

Theoretically, they follow the same rules, or should, as any wheeled vehicle, but unfortunately, too many of them do not know this.

Many youngsters sail off to school, full of energy and enthusiasm but without much regard for caution.

Many of them do not know that they're supposed to ride on the right hand side of the street, that they're supposed to give hand signals when turning, and otherwise move along as if they were in a car.

But unfortunately they're not in a car, and they're on a vehicle that weighs only a few pounds, competing with cars and trucks that weigh two tons or more on the average.

So it's our obligation, as motorists, to give them the benefit of the doubt, and a little extra room on the road.

Even when you see one in front of you, apparently riding properly, it's a good idea to assume that he may just cut left in front of you.

And if you're one of the parents, the few extra minutes devoted to bike safety talks with your youngster could certainly pay big dividends.

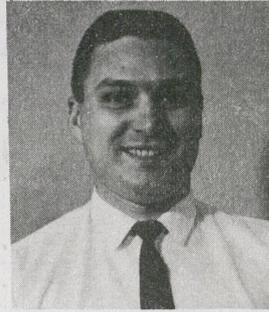

Certainly none of us would want to be involved in a car-bike collision.

Working together, as motorist and parent, we can make good "drivers" of these youngsters.

SIGNS OF FALL: One sign of fall is children going back to school. Other signs remind motorists that they are near a school. "Watch for the children and obey the signs," urges Carol Lane, women's travel director of Shell Oil Company, who devotes much of her work to traffic safety. "Help make the season safe for children."

PROMOTIONS AND TRANSFERS

R. E. CLINAGE

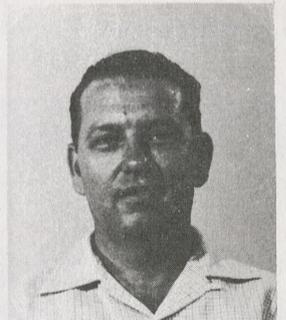

G. D. FLANAGAN

Refinery Superintendent A. S. Lehmann has just announced the transfer of R. E. Clinage, Supervisor Treasury, to the Economics Department of the Exploration and Production Organization in Head Office, New York, effective October 1, 1965.

Bob Clinage, a 1958 graduate of Anderson College with a B.S. degree in Accounting, joined Shell in October 1960 as an Accountant in the Houston Area Treasury Department. He was promoted to Sr. Accountant in May 1963, and was transferred to the Houston Refinery to his present position of Supervisor Treasury in August 1964.

G. D. Flanagan will be transferred from the Houston Data Service Center effective September 16, 1965, to replace Clinage.

Gerry Flanagan was employed by Shell as Operator Tabulating Machine in the Midland Area following his graduation from North Texas State with a B.B.A. degree in Accounting in May 1958. After various accounting assignments, he was transferred to Houston Area in May 1963 as an Accountant, as a result of the consolidation of the accounting functions in the Houston-Midland Areas. He was promoted to Sr. Accountant in December 1963, and was transferred to his present position in the Houston Data Service Center in September 1964.

G. O. WILLIAMS

As a result of the above transfers and the realignment of certain accounting responsibilities, P. D. Wallace will act as the Treasury Manager's deputy during his absence.

Lube Oils Department Manager K. J. Kitzmiller has announced the promotion of G. O. Williams to the position of Shift Foreman in the "B" Section of the Department effective September 15, 1965. George Williams joined Shell at the Houston Refinery in September 1940. He worked in the Refinery Laboratory and Gas Department before transferring to Lube "B" in June 1948.

NOTICE

There will be a 10-Year and Over Service Party again this year. Date and time of this event will be announced in next week's SHELL-GRAPH.

REFINERY UF COMMITTEE (CONT'D.)

blind". Yet, behind it all, there is a promise of a brighter tomorrow for these people - provided the money is there.

The job of raising more than \$26,000 of these much-needed funds rests with the Refinery Committee. It is a job they are tackling with confidence because, according to co-chairman R. W. Henry, "The Refinery not only has the reputation of living up to its obligations - it usually is the first to do so".

"This year," stated co-chairman L. W. Garner, "we'd like to see the guy who digs down in his pocket for a few bucks switch to payroll deduction where he could give more and feel it less - but we'll take anything," he hastened to add.

(Cont'd. p.4)

GLAUCOMA CAN BE DETECTED - YOU CAN BE TESTED WITHOUT CHARGE

Glaucoma can strike you, or anyone else, but most of its victims are over 40. The best defense against glaucoma is a medical eye examination, according to the Texas Society for the Prevention of Blindness which annually sponsors glaucoma screening free of charge to anyone. The simple, painless tests will be conducted in the Cullen Nurses Home, 1001 Smith, in Houston from 7:00 p.m. until 9:30 p.m. on September 20th and 21st. Medical doctors assisted by Registered Nurses volunteer their services in an effort to prevent blindness by detecting glaucoma in time to control the disease.

Refinery Nurse Hortense Hines, who annually volunteers her services to assist in this work, says everyone should guard against glaucoma by having an eye examination every two years, but should watch particularly for danger signals which include: frequent change of glasses, none of which is satisfactory...loss of side vision...blurred or foggy vision...inability to adjust eyes to darkened rooms.

Remember, half of all blindness can be prevented - and this test won't cost you a penny.

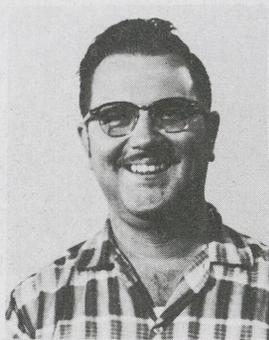

Dispatching Department's Charlie Stebbins has received a \$5 prize from The National Safety Council for his entry in their Safety Calendar Contest No. 6. Congratulations Charlie!

Honors: Fire and Safety Manager L. J. Grossheim has been named to the Fire Prevention Committee of the Houston Chamber of Commerce.

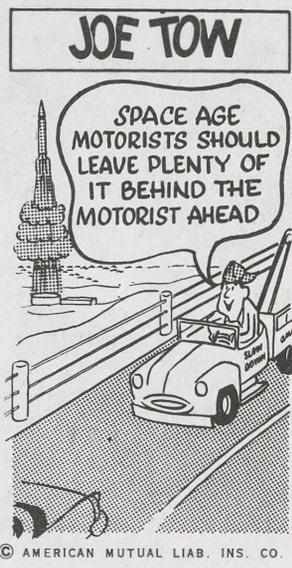

RETIREE T. G. ORREN DIES

We regret to announce the death of Mr. T. G. Orren on September 12, after an extended illness. He was 38 years of age. Mr. Orren retired as an Operator No. 1 in the Distilling Department on August 1, 1965, after completing over sixteen years of service. He was born in Saltillo, Texas, and attended school in Mt. Vernon, Texas. He is survived by his wife, Mrs. Irene Orren, who resides at

134 Bay Oaks Drive, La Porte.

Funeral services were held at 10 a.m., Tuesday, September 14, at the Art Simpson Funeral Home in La Porte, with burial in the Old Saltillo Cemetery, Mt. Vernon, Texas, on Wednesday, September 15.

REFINERY UF COMMITTEE (CONT'D.)

Departmental solicitors start their 3-day job on Monday, September 27. Keep in mind when you are contacted that these folks are volunteers who need your help and cooperation, and who, in turn, stand ready to answer your questions and assist you in any way they can.
