of the Houston Outdoor Nature Club

August 2004
Vol. 52 No. 6

August Meeting

Monday, August 2, 2004 7:00 p.m.
Bayland Community Center
6400 Bissonnet

Program:

"Research at Smith Point" by Sumita Prasad

Smith Point is known to OG members and other birders in the Houston area as a great place to watch raptors and other migrants in the fall. This locality, on the eastern shore of Galveston Bay in Chambers County, will be the destination of an OG field trip in September.

Official counts are recorded from August 15 to November 15. Mississippi kites typically show up in August; Broad-winged hawks, the most numerous migrants, pass over the tower by the hundreds or thousands in late September; and falcons, accipiters, ospreys and eagles, though less abundant, are seen regularly through much of the season. The hawk watch relies upon the efforts of volunteers in addition to the full-time counters. Visitors can practice their identification skills, or just enjoy the spectacle.

Sumita Prasad is Avian Monitoring Program Coordinator for the Gulf Coast Bird Observatory in Lake Jackson. She coordinates all of GCBO's research projects and efforts, including Smith Point Hawk Watch, Project Prairie Birds, Migration Monitoring, and the Columbia Bottomlands Forest Bird Study Group.

Vote on Library:

A special agenda item on the regular business meeting (preceding the program) will be a vote by members on the management of the OG-ONC library. See details on page 2.

Other Events:

Saturday, August 21

Chairman's Message

Welcome to a new OG year! We are sharing two meetings with Houston Audubon this year to bring in well-known birding experts as speakers. Both September and March are months with the 1st Monday and 2nd Wednesday falling in the same week and thus were chosen as good times to share speakers. September 8th we are hosting the Tvetens, and March 9, 2005 Kevin Karlson is coming to Houston for the joint meeting and a field trip.

--continued p. 2

--Chairman's Message continued...

Both meetings will be at the Houston Zoo on regular HAS meeting dates. Be sure to mark your calendars for these meetings.

Other speakers include Gary Clark (February 2005), Dr. Jane Packard of A&M (April, 2005), and our own Sumita Prasad (Hawks in August, and Hummingbirds in January). These, together with other great speakers Michael Williams is lining up, will make this a great year for speakers' topics. Sumita Prasad will start off the year talking about hawks of the Smith Point Hawk Watch to get us ready for hawk migration.

Bill Saulmon has put together a wonderful group of field trips to several new places and, of course, to many of our great seasonal locations. We'll be exploring the Chappell Hill area, Kingwood East End Park, and checking out King Ranch on one of the quarterly trips.

Thank you both for your hard work to get us ready for the 2004-2005 year. Even though it's still hot summertime in Houston, it's time to polish the lenses on your binoculars and scopes, ice up the cooler with drinks and snacks, load up the car, and go birding! See you August 2nd!

--Kathy Farr

About the Ornithology Group

The Ornithology Group (OG) is a division of the Outdoor Nature Club (ONC), a non-profit organization dedicated to greater knowledge about the environment and wildlife of the Upper Texas Coast. The OG is a club of individuals interested in all aspects of birding, including bird identification, listing bird sightings, competing in birding events, and preserving bird habitat. Some members study bird behavior, biology, distribution and migration, while others just enjoy watching birds. The organization is designed to accommodate these diverse birding interests. Monthly meetings and field trips provide an opportunity to interact with and learn from experts in local and international birding.

Library Committee Recommendation

The Ornithology Group Library has grown over the last fifty years to a collection of approximately 260 books, 20 video tapes and 10 audio tapes. The collection fills 10 boxes that have to be shifted around from one member to another as the librarian changes, always having to be stored somewhere between meetings. Currently the librarian brings about 2 or 3 boxes of the most recent books and tapes to each meeting for members to peruse and check out when desired.

A committee was formed at the December 2003 OG meeting to find a permanent place to house the portion of the library that is rarely used. This committee is composed of Andy Scott, Skip Almoney and Margret Simmons. Several options were investigated, including Bayland Community Center and Edith L. Moore Nature Sanctuary, but they didn't have room to

accept more books. The Houston Arboretum was also considered, but would not necessarily take all of the books and would require that OG give up ownership of the books.

The committee met on June 28, 2004 with Gloria Dow (President of the Texas Master Naturalist Gulf Coast Chapter) and another member of the TMN group. This group is enthusiastic about starting a library to be housed at Bear Creek Park in the TMN chapter office that could be used by TMN members, birders, scout groups, etc. They hope to add more books from other groups also looking for homes for their books, possibly the Native Plant Society or other nature-related groups. They have shelf space to store the books in an orderly manner, a table for research work and possibly use of a computer. They have personnel who will allow the books to be checked out and will take over

--continued on p. 3

--Library, continued from p. 2 ...

the check-out procedures. An important aspect is that the OG will maintain ownership of the books.

The OG website will continue to list all of the books and tapes in the library, showing which are in the group brought to the meetings (and thus in the possession of the librarian) and

which are housed at the Texas Master Naturalist chapter office.

The committee believes that housing the excess OG books and tapes at the TMN Bear Creek office is a good workable solution to our storage problem. We recommend to the OG membership that we accept their proposal and move our books there. *—Margret Simmons*

OG FIELD TRIPS

For more information on any of the field trips below, contact field trip coordinator Bill Saulmon at 281-537-6924 or at dean1960@aol.com.

Saturday, August 21, 2004 -- Field Trip to Bolivar Flats

Enjoy shorebird migration at the expanded Bolivar Flats Sanctuary. Our trip leader will be Winnie Burkett, who is the Sanctuaries Manager for Houston Audubon Society. Winnie can update us on the new Horseshoe Marsh acquisition and future plans for the Bolivar area. We'll start early to avoid some of the heat. Meet at the parking lot on the Bolivar landing side of the Bolivar ferry at 7:30 AM. Remember to allow a little extra time for the ferry ride from Galveston to Bolivar. Bring water, sun lotion, bug spray, hat, and your binoculars/scopes. We'll end around lunch time.

Saturday, September 18, 2004 -- Field Trip to the Smith Point Hawk Watch

Join us for a true spectacle of nature as thousands of migrating raptors stream over the Smith Point Hawk Watch platform. Water birds including Magnificent Frigatebirds can also be seen from the platform. We'll also bird the nearby oak mottes for passerine migrants and visit Robbins Park for shorebirds. Meet hawk watch counter Bill Saulmon at 8:30 at the Smith Point Hawk Watch platform. To get there from Houston, travel east on I-10 to exit 813. Turn south on Highway 61 for a few miles to the 4-way stop. Proceed straight ahead through the stop where the road becomes FM 562. Follow FM 562 to a fork (Y) in the road and stay on FM 562, which veers to the right at the Y. After approximately 14 miles you will arrive in the small village of Smith Point. Continue straight ahead towards the bay, and just before the road dead-ends into the bay take the gravel road on the left (look for the Hawk Watch sign). Bring water, sun lotion, bug spray, hat, and your binoculars/scopes. You can bring a lunch if you want to continue birding in the afternoon.

Other Announcements--

Saturdays, August 7 & September 4 – Breakfast with the Birds, 7:45 a.m.

Jesse H. Jones Park and Nature Center, 20637 Kenswick Drive; ph. 281-446-8588

Informal, fun and educational outings exploring the park observing the many species of birds that live in or visit the park. Come join the fun. Great for birders at any experience level. Ages 12 and up. Free, but reservations required.

August 21-22 – Lubbock's 1st Annual Prairie Festival

Municipal Garden & Arts Center, 4215 South University, Lubbock, Texas -- phone 806-767-3724
Llano Estacado Audubon Society www.leas.bizland.com/prairiefest.htm

On Saturday, August 21, the festival will preview indoor booths featuring merchandise and information, food, drinks and music, as well as speakers and displays on prairie science, ecology and restoration. The second day, Sunday, August 22, will feature field trips to several sites around Lubbock to view the prairie and its inhabitants, such as Black-tailed Prairie Dogs, Burrowing Owls and Ferruginous Hawks.

Sunday, August 22 – Brazoria NWR (Houston Sierra Club trip), 7:30 a.m. – 4 p.m.

Contact: Frank Blake at (713) 528-2896 or email frankblake@juno.com

Brazoria National Wildlife Refuge, just south of Freeport, is an area of coastal marsh and grassland that provides important habitat for a variety of shorebirds and other species. In summer, birds that nest on the refuge include: ten species of herons and egrets, white ibis, roseate spoonbill, mottled duck, white tailed kite, clapper rail, horned lark, black skimmer, and scissor-tailed flycatcher. Summering wood storks may also be seen. The refuge offers several hiking trails, and a variety of wildlife viewing opportunities. After visiting Brazoria National Wildlife Refuge, a stop will be made at Sea Center Texas, a state-of-the-art marine fish hatchery and aquarium located in Lake Jackson. The focus of the Sea Center is the marine life of Texas's bays and Gulf waters. Coastal marshes, bays, estuaries, and the Gulf of Mexico are depicted in a unique series of habitats and aquaria.

Saturday, September 11 -- Xtreme Hummingbird Xtravaganza

Gulf Coast Bird Observatory – 103 W. Highway 332, Lake Jackson, Texas; 9 a.m. – 3 p.m.

See hundreds of migrating Ruby-throated Hummingbirds stock up on flower nectar or at feeders as they prepare for their southbound journey to the tropics. We will have speakers on hummingbird biology and gardening. On-going hummingbird banding demonstrations will provide viewers with a close-up view of these tiny jewels, and Houston Audubon Society will be on-hand with live birds of prey. The GCBO Nature Store will offer books, feeders, hummingbird plants, and other hummingbird- and migration-related items. Food and drinks will be available. A conservation donation of \$2/adult requested.

Directions: From Houston, take 288 south to Lake Jackson. As soon as you arrive in Lake Jackson, take a right onto 2004 west. Continue on 2004 west to the 2nd traffic light, which will be HWY 332 and turn west (right). On 332, you will immediately see the Girl Scout camp on the left, then just before you get to the bridge over Buffalo Camp Bayou take a left onto a semi-paved road. Look for the large white sign with "Gulf Coast Bird Observatory" in blue letters. Overflow parking with free shuttle service will be provided if necessary.

September 25-26: -- Magnificent Migrations: Workshops at the Smith Point Hawk Watch

Join official hawk counters and other experts at the Smith Point Hawk Watch Tower, located at Candy Abshier Wildlife Management Area, for a full day of presentations and exhibits on raptor migration. We will have live birds of prey, raptor-banding demonstrations, skin specimens, raptor ID talks, bird walks, nature store sales and much more! Bill Clark, the guru of the raptor world, will be on hand to answer questions, sign books, and give you pointers on the fine art of raptor ID. This celebration will fall on what, traditionally, is the best weekend of hawk migration at Smith Point! You may see a kettle of 5,000 hawks soaring above! Workshops will run from 10 a.m. to 4 p.m.

From The Spoonbill's Past
Compiled by Skip Almoney

THE
SPOONBILL

Fifty Years Ago:

The August 1954 issue of National Geographic Magazine contains an article by Roger Tory Peterson entitled it "A New Bird Immigrant Arrives." The article contains 9 illustrations of the Cattle Egret of the Old-World which suddenly appeared in several states. Mr. Peterson made this significant statement: "I believe it will do extremely well when it reaches the coastal prairies of Texas. The veldlike, semiarid terrain, oak clumps, thicket-lined rivers, and hybrid Brahman livestock are made to order for the Cattle Egret's needs.

Forty Years Ago:

--Notes from Clearing House reports--

A pair of Cardinals built at least three, and possibly five, nests at our house. The first two were found after the fourth was abandoned. Three fledglings in the third nest were still being fed while the fourth nest was being built. Three eggs were laid in the fourth nest, the first egg on June 17. One failed to hatch but two birds matured. The male helped build the fifth nest: The two fledglings in the fourth nest appeared hungry and neglected. The first egg was laid in the fifth nest on July 18. All hatched and are doing well. The first nest was located in a crepe myrtle 5' 8" from the north bedroom window, the second in a boxwood shrub 2' 2" from the bathroom window, the third in a honeysuckle 11' 7" from the front porch, the fourth in a huckleberry tree 3' 1" from the living room window and the fifth in a black haw 9' 1" from the south bedroom window. I am hoping they will build another nest.

- Arlie K. McKay

April 2004 Clearing House

By David Sarkozi -- david@sarkozi.net -- phone 713-412-4409

April is always a big month and this month 176 species and 11,611 individuals were reported. Observers this month: Al and Kathie Shultz, Pat Chukurov, Art MacKinnon, Bob and Maggie Honig, Bob and Lynn Forster, Derek Muschalek, Eric Carpenter, Jan and Mike Austin, Kathy Reiser, Linda Scott, Steve Gross, and Sue Levy.

Birds in **Bold** are Very Rare for that week of the year, birds in **bold and underlined** are new to the checklist for that week of the year. Species which are uncommon to abundant for the whole month are summarized.

Common Loon birds=19 reports=2
Pied-billed Grebe birds=3 reports=2
American White Pelican birds=68 reports=7
Brown Pelican birds=260 reports=9
Double-crested Cormorant birds=14 reports=3

***NOTES:**

Bob and Lynn Forster, Harris Hawk, Parabuteo unicinctus.
 [Anahuac NWR] On Sunday April 4, 2004 at 3:30PM At first
 upon seeing the white rump, I thought it was a northern
 Harrier but the shape was wrong. It flew differently. As it
 came closer, and I saw the underwing pattern and long tail, I
 thought Rough legged hawk. Then I saw the small white
 band at the tip of the tail, and I thought, this is really
 different. Then it banked and I saw the top of the bird. The
 bright rufous patches on the top of the wing and the white
 rump made it unequivocally a Harris Hawk.
