## The Fireplace

THE traditions and romance that have gathered around the welcoming fire burning in the hearth account for the everlasting popularity of the open fireplace. It is at once the primary decoration of any room in which it is located and the source of that quick heat so often necessary for comfort in our climate.

In the past, the charm of the open fire was only available if we subjected ourselves to the arduous labor of fire building and fire tending. It also involved a certain amount of muss and litter and the cleaning up of dust and ashes afterward.

Today, through the means of a new type of radiant fire using gas as the fuel, we can have all the glamorous beauty of the ever-interesting open fire without the disadvantages necessarily associated with solid fuels.

These remarkable new fires are made in the forms of open fires of wood or coal. Various styles and sizes make it possible to select a suitable Woodfire or Coalfire for most any hearth. There are models for small, models for large and models for fireplaces in between. Some are complete with andirons, some do not require andirons and at least one of each size and style is so designed that it may be used with andirons already in use.

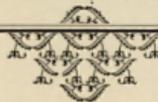

These new open fires for open fireplaces are real decorations for the fireplace at all seasons of the year and clean, odorless radiant heaters when heat is desirable. This portfolio illustrates many of the models and gives you details about

### HOMESTEAD FIRES

“The Truly Appropriate Fireplace Heaters.”

*The Fire Burns Bright  
on One's Own Hearth*

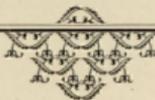

---

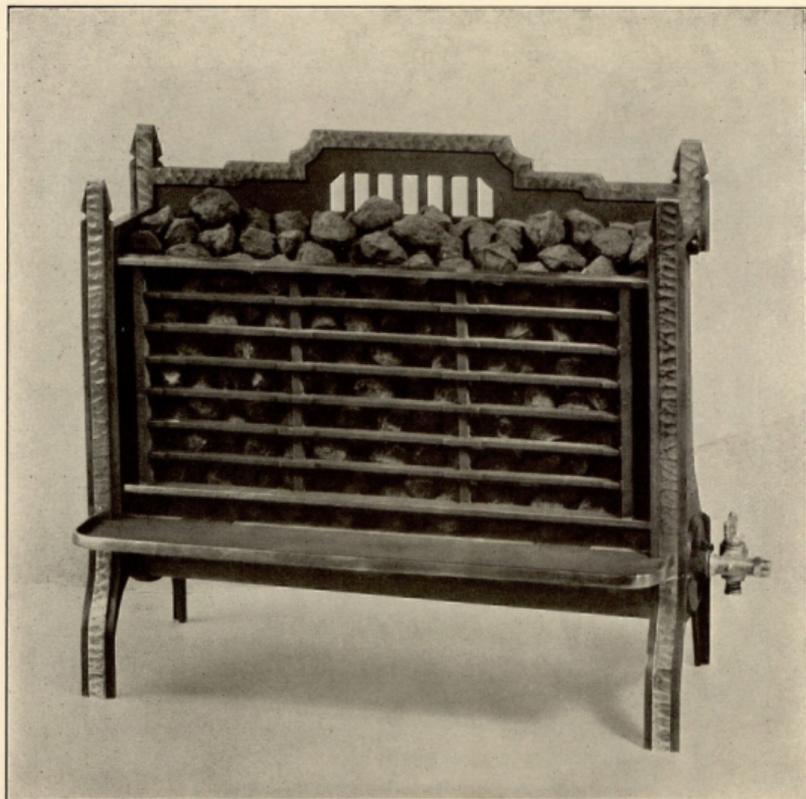

**H**OMESTEAD FIRES are Radiant Heaters for Fireplaces using gas as the fuel. Always appropriate, these fires add a touch of distinction and beauty to the Fireplace that would be an uninviting void in an otherwise charmingly decorated room.

**H**OMESTEAD COALFIRES in appearance are patterned after the Coal Baskets of England. A layer of indestructible coals of refractory clays is used to obtain the effect. Concealed behind and underneath the coals, is a radiant heat construction of advanced design. This construction is simple, substantial and serviceable. ¶Shortly after being lit, the radiant members of the Coalfire become incandescent. This terrific heat is in turn passed to and through the coals. The coals, being radiating materials, propel the clean, odorless, radiant heat into the room to dispel chill. ¶People seeing a Coalfire burning for the first time find it hard to believe that it is a gas radiant heater and that the coals are everlasting. ¶When heat is not required, Homestead Coalfires add a distinctive and decorative appeal to the fireplace at all seasons of the year.

**H**OMESTEAD WOODFIRES are very natural reproductions of Oak or Birch logs piled over and in front of a radiant ember. ¶Burning, the ember gives off radiant heat in generous quantities. The effect is one that meets with immediate favor with those who prefer the traditional wood fire on the hearth. ¶An ingeniously concealed base casting carries the mechanical construction necessary. This base casting is designed to fit correctly on any andirons. ¶Woodfires are available in two sizes and with Birch or Oak logs. It is possible to make a selection that will add immeasurably to the appearance of the fireplace at all times and supply quick, clean, odorless, radiant heat with effortless ease.

## Homestead Coalfire No. 8

**T**HIS High-Front Coalfire is Homestead's answer to the demand for a radiant heater type of different appearance, at a popular price.

Gone are the ordinary mantle or tube type radiants and in their place are the refractory coals perfected for Homestead Coalfires.

When this unit is burning the high front of red hot glowing coals gives off a volume of radiant energy that is truly startling.

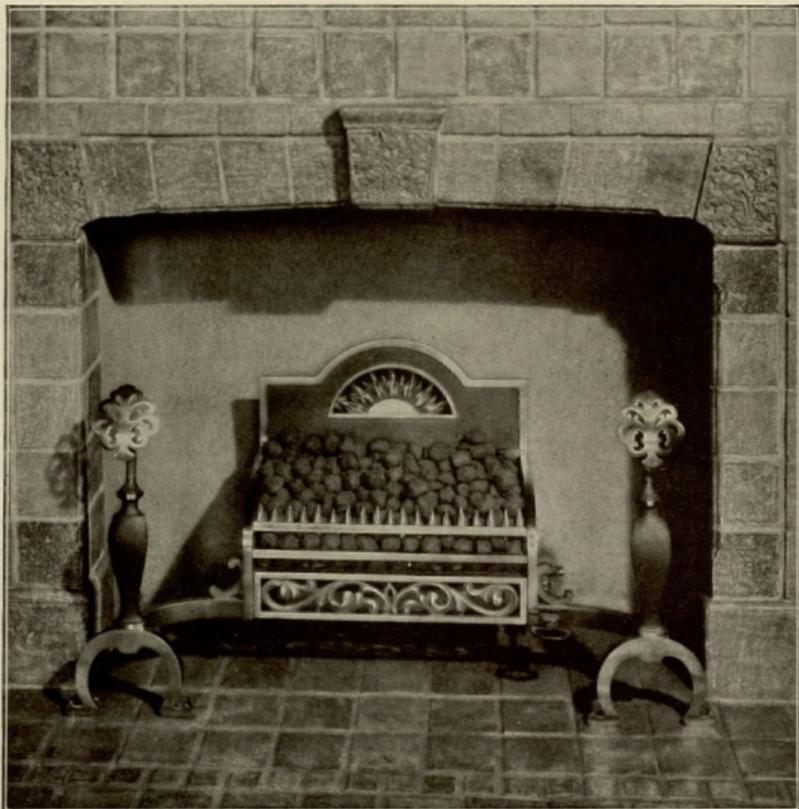

This heater has a plated black and brass finish that is pleasing and dignified.

It will combine nicely with most fireplace furnishings.

Suggested for fireplaces from 20" to 30" wide.

Capacity, 20,000 B. T. U. per hour.

*A. G. A. Laboratory Approved.*

## Homestead Coalfire No. 10

A popular priced coalfire in a mighty interesting design that will go well with any average fireplace. The andirons, included with the unit, are nineteen inches high.

The coal basket is seventeen inches wide and when lighted the mass of red-hot coals gives forth a large volume of clean, odorless heat.

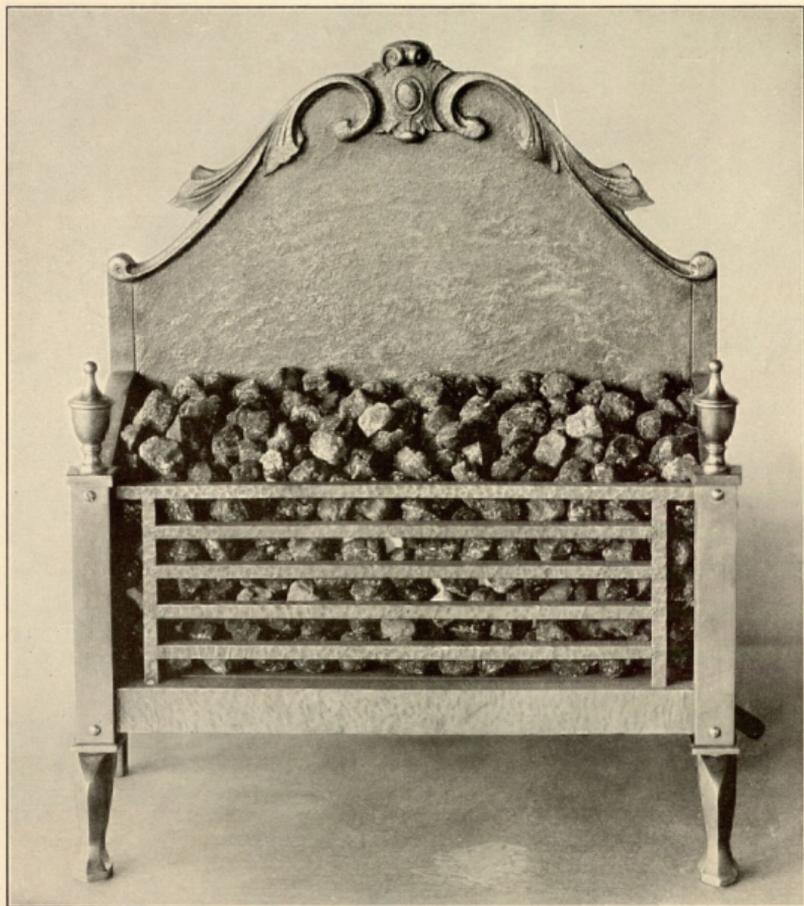

Two finishes are available. One is polished steel finish, rich and dignified. The other is a very striking brass finish with all the highlights in bright brass and the backgrounds are oxidized almost pure black to bring out the contrast.

Coalfire No. 10 can be recommended, as a heater and as an appropriate fireplace unit, to be the best value the market affords at its price.

Suitable for fireplaces 24" to 34" wide.

Approx. Capacity: Mfd. Gas 40'. Nat. Gas 22'.

A. G. A. Laboratory Approved.

### Homestead Coalfire No. 11

**T**HIS interesting little English Coal Basket becomes a glowing fire of individual red hot coals a few minutes after the gas is turned on and the match applied.

A generous quantity of clean, odorless, radiant heat is developed that is most welcome. It casts an interesting glow over the hearth that can be equalled only by a fire of anthracite or cannel coal.

This basket is 20" wide across the front and it may be used in rather small fireplace openings. The fireback is adjustable and may be lowered  $3\frac{1}{2}$ " if necessary. No andirons are required.

The metal parts are finished as antique cast and wrought iron and the urns and legs are finished in brass.

Suitable for fireplaces 24" to 30" wide.

Approx. Capacity: Mfd. Gas 45'. Nat. Gas 24'.

A. G. A. Laboratory Approved.

### *Homestead Coalfire No. 13*

**T**HIS particular model is supplied complete with andirons as illustrated. It is similar to the No. 11 in appearance but is suitable for larger fireplaces because of the increased width due to the addition of andirons.

If the purchaser already has andirons, they may specify Coalfire No. 12. It is designed with special brackets so that it may be used with any andirons.

The Fireback is adjustable to meet the requirements of any individual fireplace.

The antique cast and wrought iron finish combined with the brass ornamentation make this a deservedly popular model that may be recommended with complete confidence.

Suitable for fireplaces 28" to 35" wide.

Approx. Capacity: Mfd. Gas 45'. Nat. Gas 24'.

*A. G. A. Laboratory Approved.*

## Homestead Coalfire No. 21

**T**HIS particularly beautiful model does not require andirons.

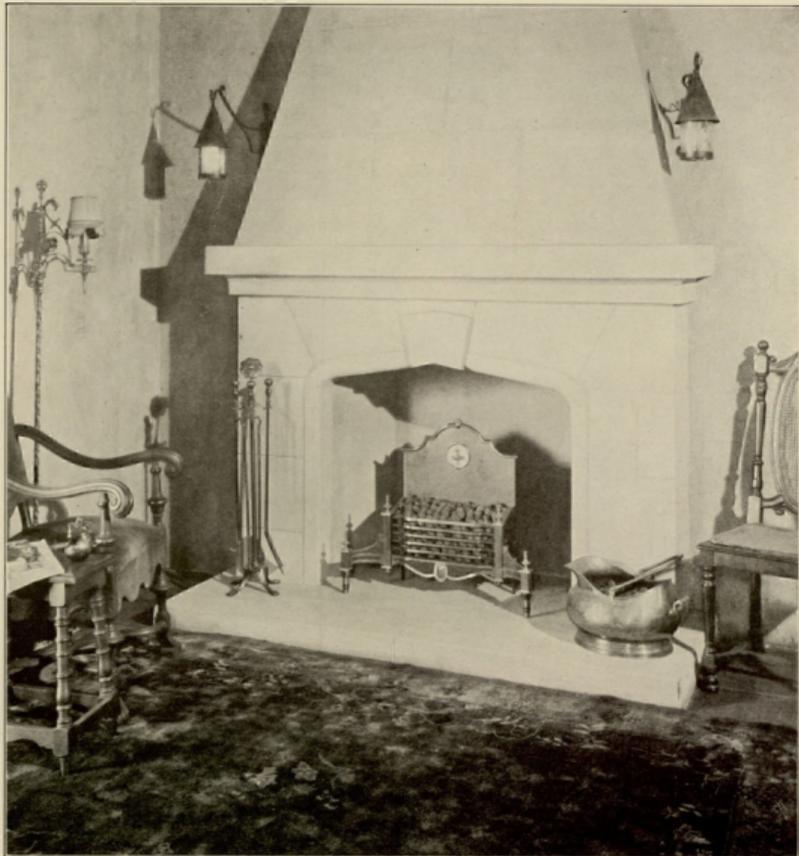

Gracefully curved front bars, solid bronze embellishments and polished steel, rust proof finish all combine to make it a rich and distinctive addition to any small fireplace.

The luxury of its clean, odorless, radiant heat together with its charming appearance means never-ending satisfaction.

Recommended for fireplaces from 24" to 30" wide.

Approx. Capacity: Mfd. Gas 45'. Nat. Gas 24'.

*A. G. A. Laboratory Approved.*

## Homestead Coalfire No. 23

**A** bit of Old England is this typical English Dog Grate.

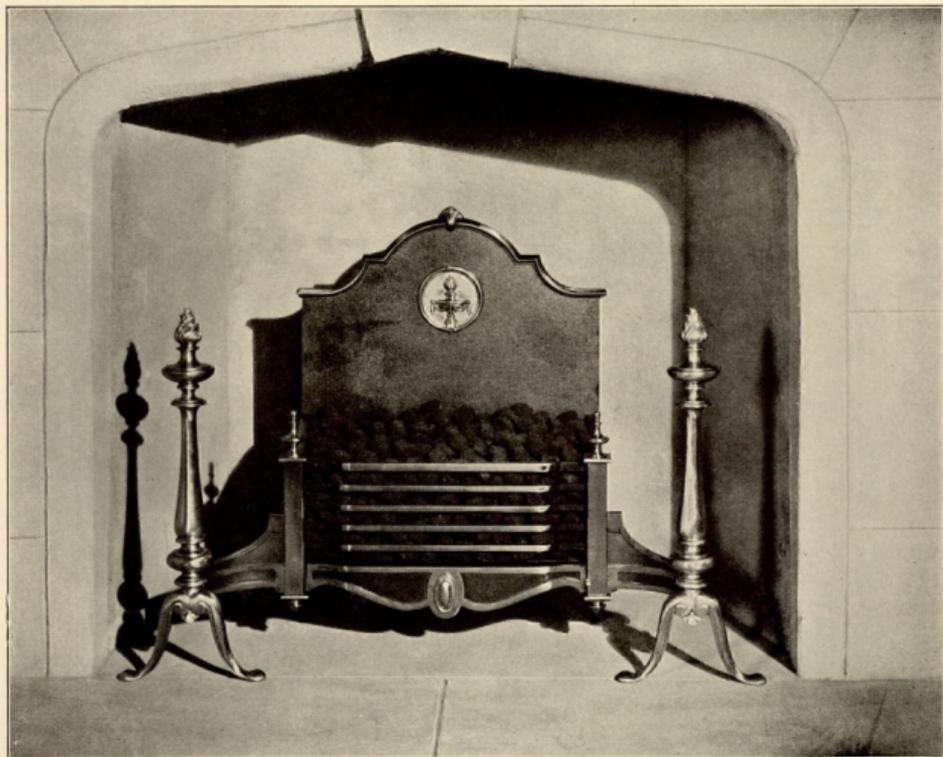

Solid bronze ornamentation and the rust proof, polished steel finish combine to make it exceptionally attractive. This Dog Grate will be particularly interesting where decorations are of English inspiration.

With a Dog Grate of this type, no andirons are required. If it is desirable to use this basket with andirons already owned by the purchaser, order Coalfire No. 22. It has brackets adjusted so that it may be used with any andirons. Height of Fireback adjustable.

Suitable for fireplaces 30" to 40" wide.

Approx. Capacity: Mfd. Gas 45'. Nat. Gas 24'.

*A. G. A. Laboratory Approved.*

## Homestead Coalfire No. 24

**T**HIS magnificent heater is a delight to the eye as well as being a real heater. The reflection of the light from the glowing coals on the **solid bronze** andirons, medallion, urns and finials is truly a sight to behold.

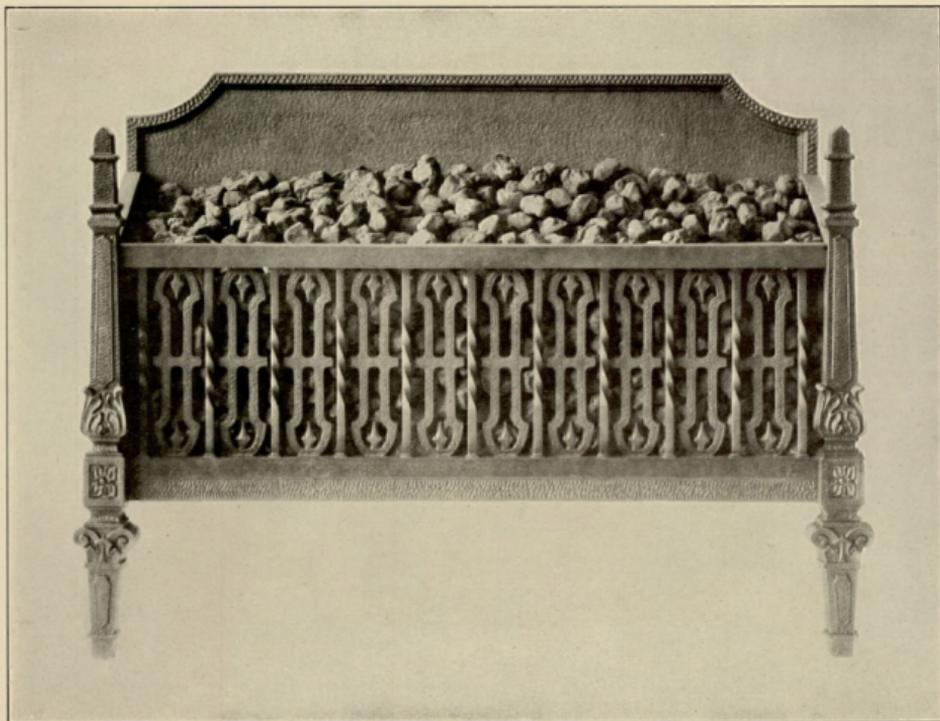

The rust proof, polished steel finish of the basket makes it rich and distinctive enough for the very finest surroundings.

A de luxe model, a superb heater and a decoration of distinction that will give its possessor endless comfort and pleasure.

Suitable for fireplaces 30" to 42" wide.

Approx. Capacity: Mfd. Gas 45' Nat. Gas 24'.

*A. G. A. Laboratory Approved.*

## *Homestead Coalfire No. 2-30*

**T**HIS dignified Coal Basket with its fine armor finish is, we believe, the largest capacity gas fireplace heater available. It will do an exceptional job of heating in an immense room.

The No. 2 model does not require andirons as its depth and size amply fill the fireplace opening.

The same design is also available in baskets 15", 20" and 25" wide across the front.

The 30" size is recommended for fireplaces from 36" to 48" wide.

Approx. Capacity, 30" size: Mfd. Gas 90'. Nat. Gas 50'.

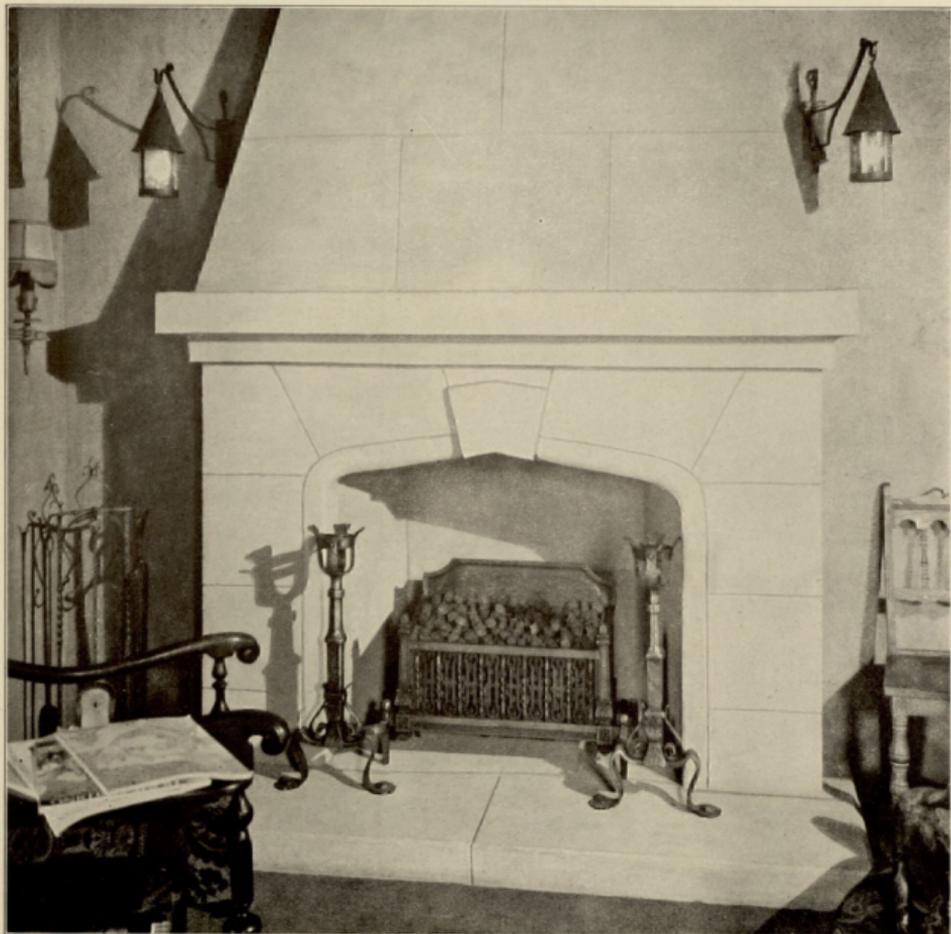

## *Homestead Coalfire No. 2-A-25*

**T**HE 25" size of the No. 2 model equipped with andirons that match the basket in design. The addition of the andirons adds little to the cost and gives it a grace and balance that makes the cost worth while.

The 25" model is recommended for fireplaces from 30" to 36" wide.

The basket is also available in 15", 20" and 30" sizes.

Approx. Capacity, 25" size: Mfd. Gas 65'. Nat. Gas 35'. A. G. A. Laboratory Approved.

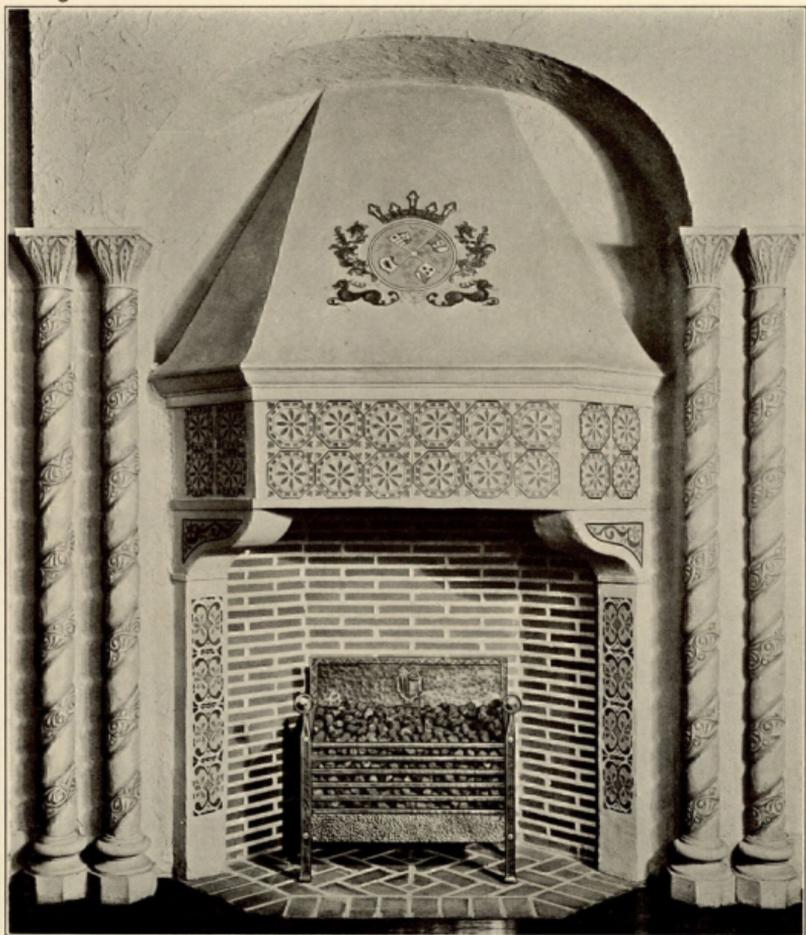

## *Homestead Coalfire No. 2-B-25*

**A**N adaptation of the No. 2 basket fitted with brackets for use in conjunction with any andirons the user may already own or may wish to purchase from the hundreds of different styles available in the market.

The armor finish on all these baskets harmonizes with wrought iron or flemish finished andirons and contrasts very satisfactorily with bronze or brass andirons.

The 25" is recommended for fireplaces 30" to 36" wide.

Approx. Capacity, 25" size: Mfd. Gas 65'. Nat. Gas 35'. A. G. A. Laboratory Approved.

## Homestead Coalfire No. 5-25

**C**OALFIRE No. 5-25" was specifically designed for the many homes and fireplaces of Spanish influence in Southern California, the Southwest and Florida.

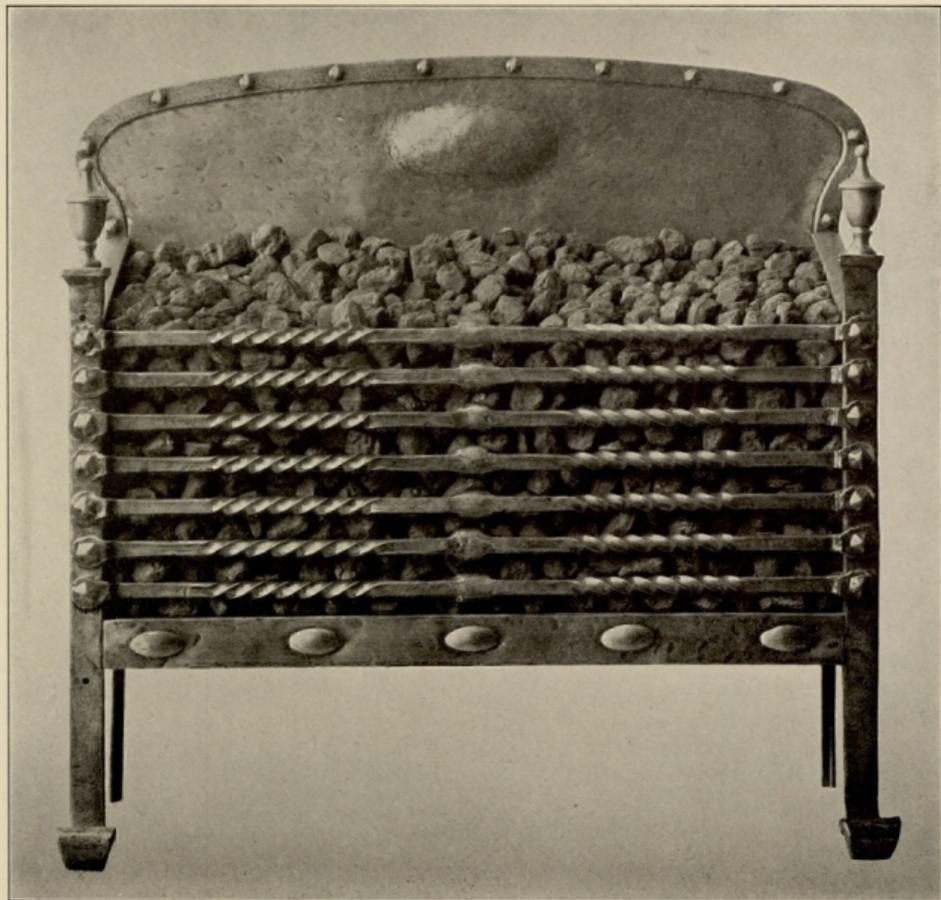

It is finished in an almost perfect reproduction of Hand Wrought Iron with Hammered Brass Embellishments, such as the column tops, rivet heads, and bottom band on basket front.

While inspired by the Spanish tradition this sturdy basket will be very acceptable wherever Wrought Iron Hardware, Lighting Fixtures and Fireplace Fittings are used.

In common with all Homestead Fires, the No. 5-25" will deliver a real volume of clean, odorless, radiant heat whenever required.

Suitable for fireplaces 30" to 44" in width.

Approx. Capacity: Mfd. Gas 65'. Nat. Gas 35'. A. G. A. Laboratory Approved.

### *Homestead Coalfire No. 3-25*

**T**HIS is the large type of Coalfire with Genuine Hand Wrought Iron front made by craftsmen famous throughout the country for design and execution of fireplace fittings.

The rivet heads and urns are of solid brass, dull finished to blend with the wrought iron.

This design is particularly recommended for rooms in which the hardware and lighting fixtures are of wrought iron.

This model is also available in 20" and 30" sizes.

The 25" size is suggested for fireplaces from 30" to 36" wide.

Approx. Capacity, 25" size: Mfd. Gas 65'. Nat. Gas 35'. A. G. A. Laboratory Approved.

## *Homestead Coalfire No. 4-25*

**A**NOTHER Hand Wrought model of different design than the No. 3 but made by the same craftsmen.

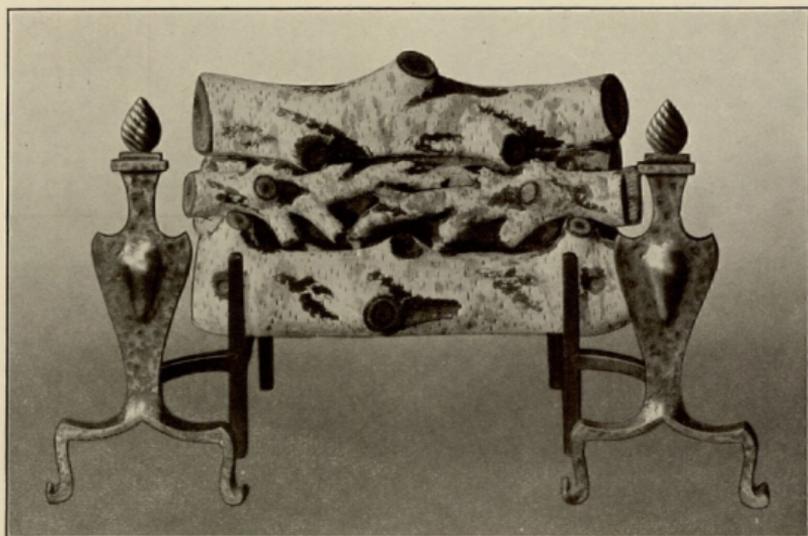

The solid brass rosettes and rivet heads, dull finished, contrast nicely with the highlights of the hand polished wrought iron.

This model has the same characteristics as all the Homestead Fires, that is, real heat and real fireplace decoration.

Coalfire No. 4 is particularly effective for fireplaces in rooms of English inspiration. Also available in 20" and 30" sizes.

The 25" size illustrated is suggested for fireplaces 30" to 36" wide.

Approx. Capacity, 25" size: Mfd. Gas 65'. Nat. Gas 35'. A. G. A. Laboratory Approved.

## *Homestead Woodfire No. 02 Birch Logs*

**A** MOST natural reproduction of Birch logs piled up over radiant embers. Also available with oak logs.

This model is furnished complete. Andirons are wrought iron finished with brass ornamentation as illustrated.

If you wish to use this Woodfire with andirons of your own selection, specify Woodfire No. 01 and it will fit them.

Winter or Summer, a pile of logs on a good-looking pair of andirons takes away the barren appearance the fireplace otherwise presents.

Suitable for fireplaces 24" to 34" wide.

Approx. Capacity: Mfd. Gas 45'. Nat. Gas 24'.

*A. G. A. Laboratory Approved.*

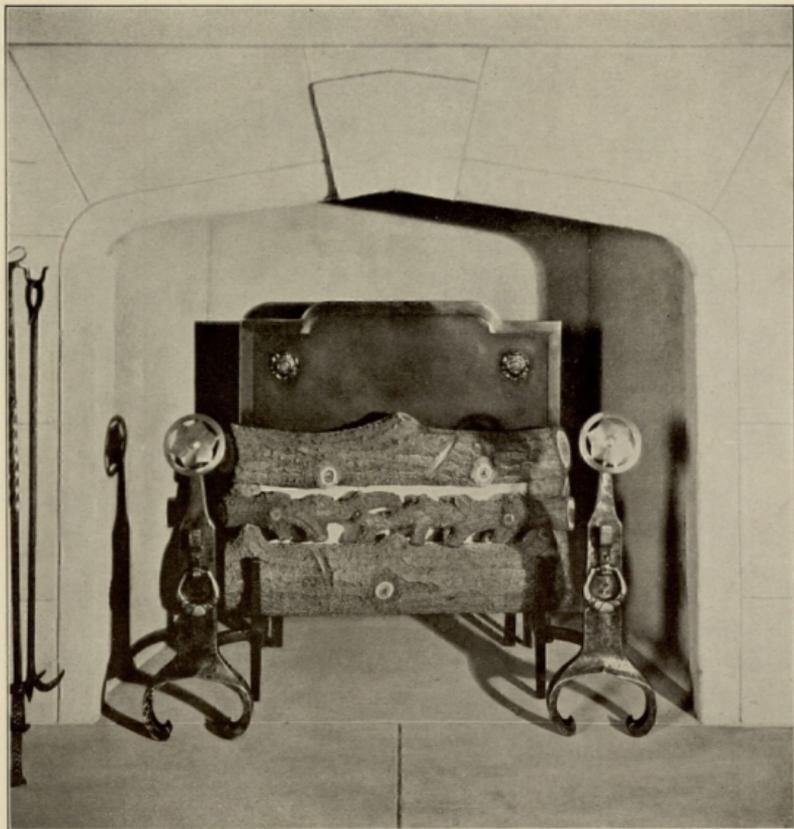

### *Homestead Woodfire No. 03*

**A** VERY complete Woodfire unit. Includes the Woodfire, Andirons and the interesting old-time Fireback. The fireback is adjustable and hides the fire-scarred back wall in the fireplace previously used with wood or coal.

Andirons and Fireback are of antique cast and wrought iron finish with brass ornamentation.

Like all Homestead Woodfires, it may be obtained with either Oak or Birch logs. Suitable for fireplaces 24" to 34" wide.

Approx. Capacity: Mfd. Gas 45'. Nat. Gas 24'. A. G. A. Laboratory Approved.

### *Homestead Woodfire No. 07*

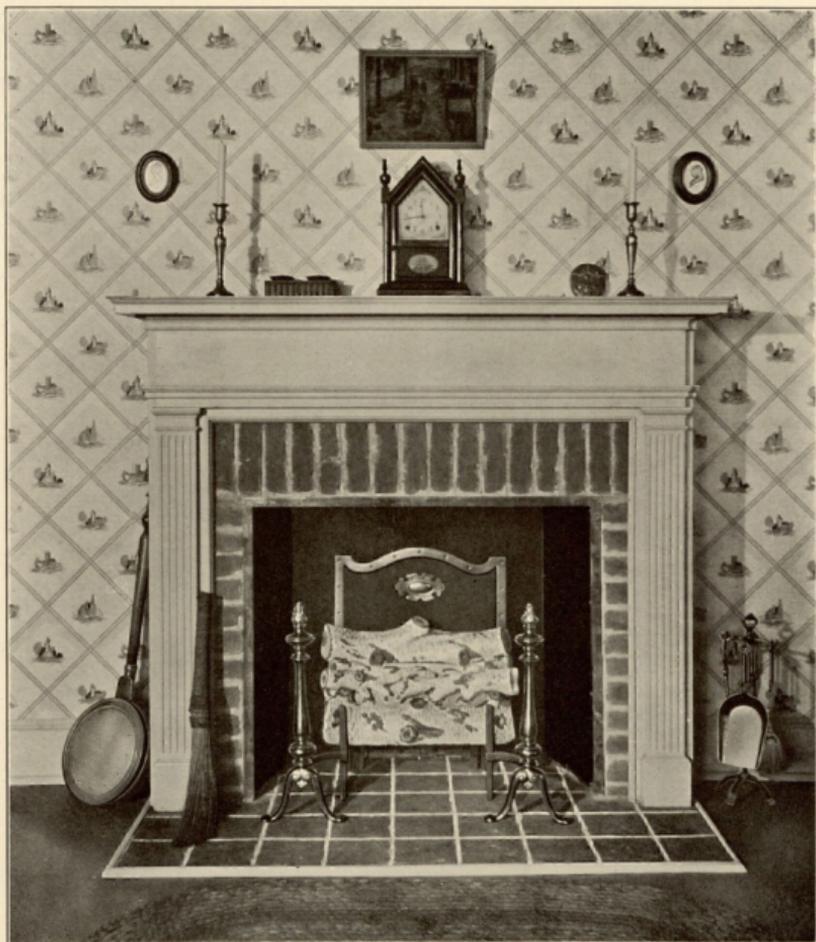

**A** WOODFIRE designed for the larger fireplaces. The logs of Birch or Oak are 25" in length. Adequate in size for any fireplace not large enough to take a full length cord wood stick.

The model illustrated is furnished complete as shown with the old time Fireback and wrought iron finished andirons. Other models of the same size are available that will fit any andirons the user may have or may wish to select from the many beautiful designs obtainable.

The larger Woodfires produce a proportionate amount of clean, odorless heat and of course all fuss and labor are eliminated.

Suitable for fireplaces 34" to 42" wide.

Capacity: Mfd. Gas 60'. Nat. Gas 30'. A. G. A. Laboratory Approved.

## Homestead Woodfire No. 011

**T**HIS Birch Woodfire unit includes the Solid Brass Andirons of Georgian design with Brass Finished Fireback to match.

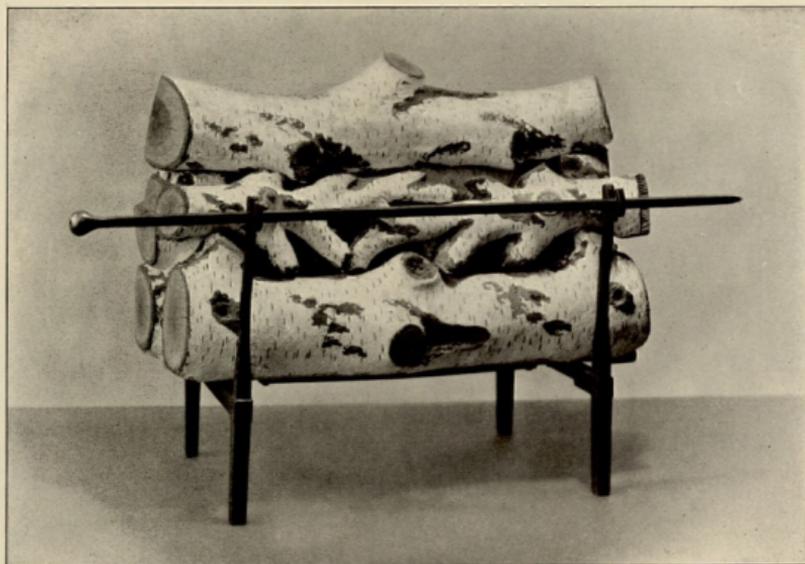

Such a combination of Brass and White Birch is particularly adaptable to fireplaces in rooms of Colonial influence.

The decorative value of this fine set of Andirons and its complementary pile of logs is constant every day in the year and when heat is required it is instantly available.

Suitable for fireplaces 30" to 40" in width.

Approx. Capacity: Mfd. Gas 45'. Nat. Gas 24'.

*A. G. A. Laboratory Approved.*

## *Homestead Woodfire No. 01 Birch*

**T**HE No. 01 Woodfire includes the stand and poker shown above with either the Birch logs illustrated or with Oak logs.

This Woodfire may be used with any andirons. The stand shown may be discarded and the channels in the base fitted directly to the andiron shanks; or the stand used as illustrated and the andirons put in place with the shanks close to the stand.

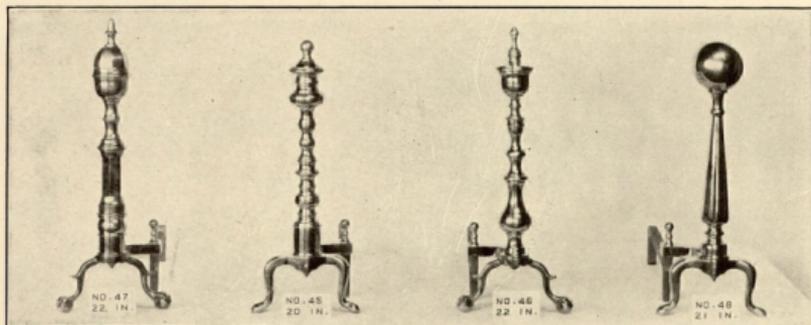

Suitable for fireplaces 30" to 40" in width.

Approx. Capacity: Mfd. Gas 45'. Nat. Gas 24'.

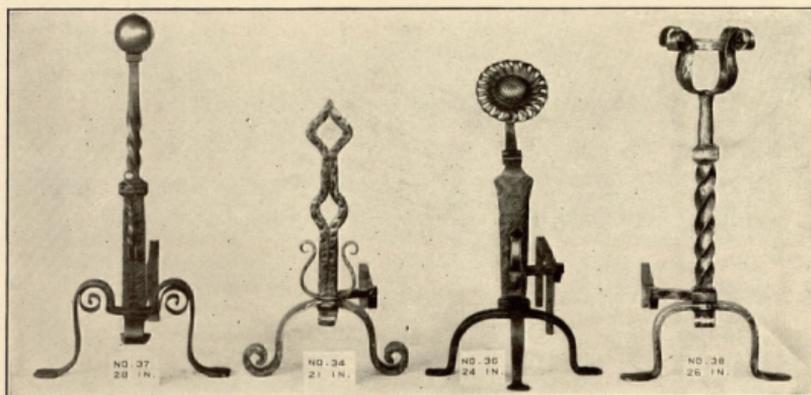

*A. G. A. Laboratory Approved.*

# Andirons

Combine with various Homestead Fires in achieving fireplaces with individuality.

Polished brass andirons above combine nicely for Colonial or Georgian period fireplaces using Coalfires Nos. 12, 22, 2B-20 or 2B-25, or with Woodfires Nos. 01, 04, 05 or 08, either Oak or Birch Logs.

Hand wrought iron andirons blend very nicely with the Homestead armor finish. Woodfires Nos. 05 or 08, or Coalfires Nos. 2B-25, 2B-30, 3-25, 3-30, 4-25 and 4-30 are particularly adaptable to this type. Quotations on matching firesets on request.

**I**N addition to the standard models of Homestead Fires we are prepared to design and execute special fires for particular installations.

It has been our privilege to collaborate with architects and interior decorators in achieving very effective adaptations of Homestead Fires to some very beautiful decorative schemes.

ABOVE—An adaption by Homestead of the Coalfire to an antique Franklin stove for a Colonial setting.

**T**HE several illustrations on this page show widely different uses of the Homestead Coalfire from the viewpoint of appearance.

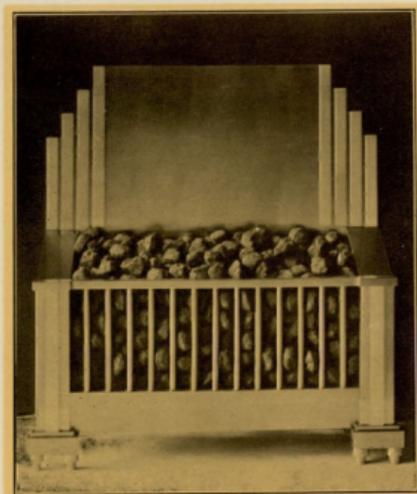

However, they all function in the same manner to furnish clean, economical heat, and

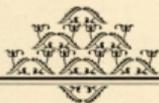

Each in its own way complements the room and the fireplace that frames it.

ABOVE—Hand wrought Homestead Coalfire especially designed for a library fireplace of Italian inspiration.

BELOW—Beautiful modern design Coalfire conceived and executed by Homestead for use with natural gas in a modern black marble fireplace.

---

## General Information

**T**HIS portfolio illustrates most of the various Fires in the Homestead line. However, there are many units designed for use with andirons the customer already owns that are not shown. See the Price and Specification Sheet under Coalfires Nos. 12, 22, 2B-20, 2B-30 and Woodfires Nos. 04, 05 and 08 for information on these models.

Any model of Woodfire may be obtained with either Oak or Birch Logs at the same price. In ordering be sure to state which type logs are desired.

Both Coalfires and Woodfires should be so installed that the front bars of the baskets and the front of the logs are on a line with the front of the fireplace opening.

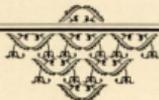

We are glad to have you consult us at any time for recommendations for any particular fireplace. If you will send us the width, height and depth of the fireplace opening, together with a brief description of the fireplace, whether brick, tile, stone or marble, etc., and the decorative period involved, we will be able to give you promptly, a practical recommendation.

## TRULY APPROPRIATE RADIANT FIREPLACE HEATERS

*Manufactured or Natural Gas*

All the enjoyment and comfort of the real coal or wood fire without the effort of building the fire or clearing away the dirt and ashes afterwards.

### THE COALFIRES

are glowing red hot coal grates in appearance. Appropriate fireplace decorations at all times and real radiant heaters. A variety of styles and sizes makes it possible to suitably equip any fireplace, be it large or small. The high English Fireback on most of the models may be adjusted as to height to fit the individual fireplace.

### THE WOODFIRES

are a most natural reproduction of oak or white birch logs piled up over embers heated to incandescence. The adjustable Fireback supplied with some of the models is an old time touch that adds to the interest of any fireplace and many times serves to hide the fire-scarred back wall in fireplaces previously used for wood or coal.

HOMESTEAD HEATER CO. INC.

*This series of Coalfires is identical in construction, combustion area,  
 and size. The difference in models is in design, finish and embellish-  
 ment only. All Firebacks adjustable in height.*

### DIMENSIONS ARE FOR THAT PART OF COALFIRE PLACED INSIDE FIREPLACE OPENING.

**COALFIRE No. 11** *Width 20", Height 20½-24", Depth 10"* 32.50  
 Complete as illustrated. Andirons not required. Antique cast and  
 wrought iron finish with brass ornamentation.

Suitable for fireplaces 24" to 30" wide. *Capacity:* Mfd. Gas 45'; Nat. Gas 24'  
*A.G.A. Approved* FOLIO No. 4.

**COALFIRE No. 12** *Width 20", Height 20½-24", Depth 10"* 32.50  
 Similar to Coalfire No. 13 except no Andirons are furnished. Side  
 brackets furnished so that this model may be used with customers'  
 Andirons. Antique cast and wrought iron finish, brass ornamenta-  
 tion.

Suitable for fireplaces 28" to 35" wide. *Capacity:* Mfd. Gas 45'; Nat. Gas 24'  
*A.G.A. Approved*

**COALFIRE No. 13** *Width 20", Height 20½-24", Depth 10"* 37.50  
 Includes Andirons as illustrated. Antique cast and wrought iron  
 finish. Brass ornamentation. Very complete and popular model.

Suitable for fireplaces 28" to 35" wide. *Capacity:* Mfd. Gas 45'; Nat. Gas 24'  
*A.G.A. Approved* FOLIO No. 5.

**COALFIRE No. 21** *Width 20", Height 20½-26", Depth 10"* 50.00  
 Complete as illustrated. No Andirons required. Rust proof polished  
 steel finish, solid bronze ornaments. Very pleasing design, rich in  
 appearance.

Suitable for fireplaces 24" to 30" wide. *Capacity:* Mfd. Gas 45'; Nat. Gas 24'  
*A.G.A. Approved* FOLIO No. 6.

**COALFIRE No. 22** *Width 20", Height 20½-26", Depth 10"* 50.00  
 Similar to Coalfire No. 24 but equipped with side brackets to use  
 with customers' Andirons. No Andirons furnished. Rust proof  
 polished steel finish, solid bronze decorations. Equally satisfactory  
 with brass, bronze or wrought iron Andirons.

Suitable for fireplaces 28" to 40" wide. *Capacity:* Mfd. Gas 45'; Nat. Gas 24'  
*A.G.A. Approved*

**COALFIRE No. 23** *Width 20", Height 20½-26", Depth 10"* 58.50  
 Distinctive English Dog Grate design complete as illustrated. Over-  
 all width of front 35". Rust proof polished steel finish, solid bronze  
 embellishment. Exceptionally high class in design and finish.

Suitable for fireplaces 30" to 40" wide. *Capacity:* Mfd. Gas 45'; Nat. Gas 24'  
*A.G.A. Approved* FOLIO No. 7.

**COALFIRE No. 24** *Width 20", Height 20½-26", Depth 10"* 90.00  
 Includes solid bronze Andirons matching embellishment on basket.  
 Rich and distinctive enough for the very finest surroundings. Rust  
 proof polished steel finish, solid bronze decorations.

Suitable for fireplaces 30" to 42" wide. *Capacity:* Mfd. Gas 45'; Nat. Gas 24'  
*A.G.A. Approved* FOLIO No. 8.

*The following series of Coalfires are identical in construction and com-  
 bustion characteristics. The difference in models is in design of bas-  
 ket, finish, embellishment and width only. The difference in width  
 accounts for difference in heating capacity. Firebacks in this series  
 not adjustable. Heaters require fireplace height shown.*

**COALFIRE No. 2-15"** *Width 15", Height 23", Depth 12"* 45.00  
 Conventional, dignified design for extremely narrow fireplaces.  
 Andirons not required. Attractive armor finish. Folio No. 9 illus-  
 trates same design in 30" width.

Suitable for fireplaces 18" to 24" wide. *Capacity:* Mfd. Gas 35'; Nat. Gas 18'

<b>COALFIRE No. 2-20"</b>	<i>Width 20", Height 23", Depth 12"</i>	<b>\$50.00</b>
Duplicate of Model No. 2-15" for wider fireplaces.		
<i>Capacity: Mfd. Gas 50'; Nat. Gas 25'</i>		
Suitable for fireplace openings 24" to 30" wide.
