RE: HOUSTON NEGRO HOSPITAL NURSES HOME

Dear Sir:

I am enclosing herewith copy of a proposal from West & Jensen on the erection of a flag pole 50' over-all, in a foundation 3' in diameter and 5' deep. It appears that first quotations made by this Company were based on screwed connection flag poles. I consider the slip joint and pin with caulking a more lasting form, but the price is more, as reflected by this proposal.

Please advise me which of these bids I shall use and whether we shall use the bronze pole tube truck at the top. My personal opinion is that it is not needed.

Sincerely yours,

MJS:P
