Busy homecoming week set

Homecoming 1975 may well prove to be most exciting of any staged in previous years.

Getting off to a flying start with a pair of Sunday, Sept. 21 shows by television star Lily Tomlin, this week will include art exhibitions, open houses and displays in various college, mime shows, President Hoffman's annual invitational luncheon for distinguished alumni and a Casino Night.

Also planned are the Jeppesen Beauty Bowl, the Frosting Frolics, the Alumni Organization's annual Distinguished Alumnus Awards Banquet, a T.G.I.F. party, special food service in the University Center, a Bloody Mary Brunch for out of town alumni, and the big game matching the scrappy Cougars against SMU.

Members of the Alumni Organization will receive a reduction in ticket prices to Ms. Tomlin's 6 or 9 p.m. Sunday shows in the UC Houston Room by presenting current membership cards. Prices with the identification will be \$2.50 if purchased in advance, \$3.50 at the door. UH students, faculty and staff members will also receive tickets at the discounted rates. Regular prices will be \$3.50 and \$4.50.

Beginning Monday, Sept. 21, the newly opened Galerie Sur La Terre will feature works by artists Rick Redd and multimedia alumnus Jim Allen. The Arbor will be the setting for Monday's Frosting Frolics sponsored by Gamma Sigma Sigma. The fun will begin at noon.

Students of mime will display their silent art style at noon Tuesday in the Satellite and again at noon Wednesday in the Arbor. A noon Saturday show has also been scheduled in Cullen Plaza.

Football films showing highlights of the 1974 season and the Bluebonnet Bowl action, will begin at 12:30 p.m. Thursday in the Satellite.

The schedule for Friday will begin at 9 a.m. with display

judging, followed by noon to 2 p.m. games in Peoples Park, sponsored by Phi Sigma Kappa. The Jeppesen Beauty Bowl will get underway at 2 p.m. with the Moody Towers of Power going against the Quad Dorm Girls. Later in the day Pi Kappa Alpha will be hosting a 3-7 p.m. T.G.I.F. party in the Cougar Den. Tickets will be on sale at the door.

Area alumni clubs will be moving enmass into Houston Friday for their annual back to the campus pilgrimage. The Astroworld Hotel has been designated as headquarters for

the action-packed weekend.

Special alumni activities will begin at 7 p.m. Friday at a champagne reception in the hotel ballroom honoring distinguished alumni and President's Award recipients. The annual banquet will begin at 8 p.m. with Houston City Councilman Johnny Goyen, who received a Distinguished Alumnus Award in 1958, acting as master of ceremonies.

Meanwhile, back on campus, the annual parade will begin at dusk and wind around campus to the big bonfire behind the Wesley Foundation. A 9 p.m. - 2

a.m. IFC Casino Night in the UC Houston Room will conclude the day's activities.

Saturday morning, the Alumni Organization will host a Bloody

See HOMECOMING, Page 2

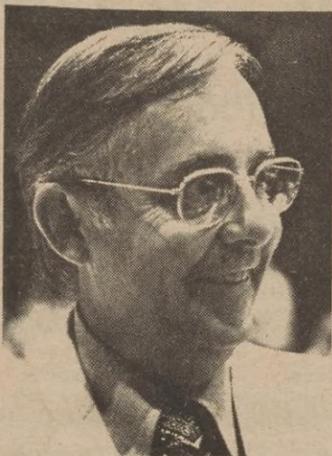

Banquet to honor notable alumni

A pair of alumni who have made significant contributions to society and brought credit to the University of Houston by their accomplishments and careers will be honored on Friday, Sept. 26 at the 1975 Distinguished Alumnus Banquet. The 8 p.m. dinner and program, preceded by a 7 p.m. champagne reception, will be held at the Astroworld Hotel.

Joining 30 others so recognized since 1949 will be Houston architect John Van Ness

and Howard W. Pollock, Deputy Administrator, National Oceanic and Atmospheric Administration.

Also slated for special recognition are Bessie Ebaugh,

VAN NESS

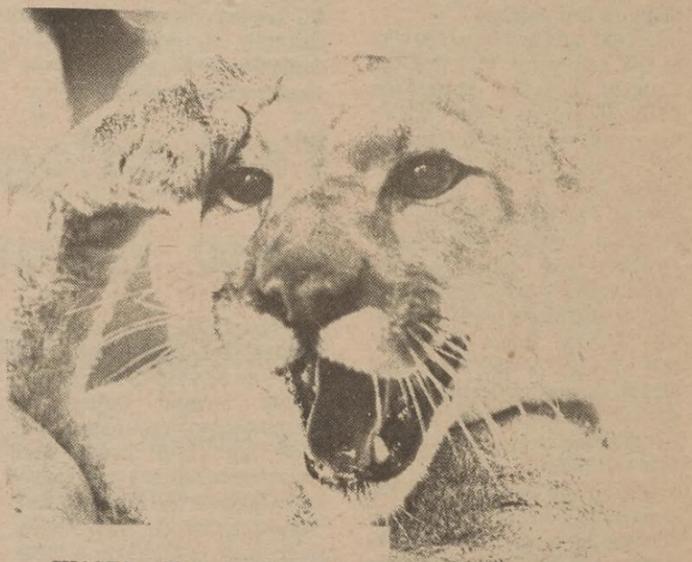

POLLOCK

who retired earlier this year after 45 years with the University and L. Standlee Mitchell, former chairman of the UH Drama Department and Dean of Men. Both will receive the Alumni Organization President's Award, given annually to one or more persons who have provided valuable service to the University.

Van Ness, who served as 1968-70 president of the UH Alumni Organization, is a native Houstonian, attended local schools and received a Bachelor of Science degree in 1951 and a Bachelor of Architecture degree in 1956 from the University of Houston.

A practicing architect with the firm Pitts, Phelps and White of Houston and Beaumont, he was one of the architects that designed the Bates College of Law complex. He was recently

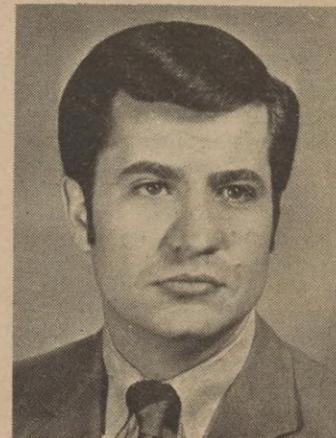

SHASTA will be saluting UH alumni returning to the campus for homecoming.

Photo By Tony Bullard

Singleton named acting VP, Dean

Dr. Roger L. Singleton, former associate dean of faculties at the University, is now serving as acting vice president and dean of faculties.

Appointed by President Philip G. Hoffman, Dr. Singleton assumed his new administrative position on July 1 upon the departure of Emmett B. Fields. Dr. Fields, who had served as UH executive vice president and dean of faculties since 1971, resigned to accept the presidency of the State University of New York at Albany.

SINGLETON

Dr. Singleton joined the faculty of the UH College of Business Administration in 1969. He served as acting dean of the College and assistant dean of faculties and in 1974 was promoted to associate dean of faculties.

The new acting vice president holds Bachelor of Science and Master of Science degrees from the University of Kansas and received his Ph.D. degree from the University of Missouri. Dr. Singleton is a member of the American Accounting Association, Beta Gamma Sigma and Beta Alpha Psi professional honor societies and serves as a consultant to the Brazilian government.

Hello.

Dear Reader:

After a long absence from the scene, The EXtra is returning to bring you news of, for and by, University of Houston alumni.

News of interesting campus activities and personalities will be among the many items included as will pictures, columns and feature stories.

We hope you will enjoy reading The EXtra. It's YOUR Alumni Organization newspaper. Your suggestions, contributions and, yes, your criticisms will be equally welcome.

Sincerely,
Peggie Marquette

Homecoming

Continued from Page 1

the doors will open at 9:30 a.m. Service will continue until 11 a.m. when the first buses are scheduled to leave for the UH campus. Shuttle bus service will continue to run throughout the day, leaving the hotel every hour and departing until 3 a.m.

Tours of the campus will leave the UC steps at 11 a.m. and continue until 2 p.m. Among the many interesting sights to be seen on special walking and bus tours will be the exhibition of 19th century Texas Hill art by the Onderdonk family in the Sarah Campbell Blaffer Gallery. Located in the Fine Arts Building, the gallery will be open from 11 a.m. until 4 p.m. Open Houses at the various Colleges will also feature interesting displays and exhibits.

Cougar fans will be on the way to the Astrodome to watch the Cougars in action against the SMU Mustangs after which many will return to the campus for a big, multi-phased Post Game Party in the University Center. For this happening the program Council and Alumni Organization have booked Heather Black and Dean Scott to play continuously until 2 p.m. in the Houston Room. Music in the manner of the Big Band sound will be performed by a group holding forth in the Cougar Den. A midnight breakfast will follow.

During the entire week, the University Food Service will be serving in a variety of novel settings inside the University Center. A Fisherman's Wharf will feature seafood specialties and fans of Texas style barbeque will find their favorite dishes in still another UH locale. Candlelight table service with a special menu for the occasion will also be provided.

Homecoming '75 is going to be a spectacular week no one is going to want to miss!

H Club elects

Dick George, defensive tackle with the 1965 Cougars, has been elected president of the "H" Association, the University of Houston's ex-letterman's club.

Other officers recently elected include: Gary Grider, vice president; Mike Johnston, secretary; and Ellery Riha, treasurer.

Members of the board of directors are: Bill Butler, J.D. Kimmel, Louis Kramer, Charlie Brown, Lonnie Holland, Bill Van Osdel, Phil Woodring, Bill Cloud and Joel DeSpain.

Plans for a fall reunion will be discussed at the next meeting of the Association.

UH prof makes musical tour

A UH professor of music and world-renowned concert violinist toured Europe during the month of June.

Fredell Lack performed her 25th solo performance with the BBC Symphony Orchestra when she played the Symphonie Espanol by Lalo, broadcast live from Cardiff, Wales.

In Berlin, she made her seventh appearance with the RIAS orchestra with a live performance of the Goldmark Concerto.

MORNING IN SPRING, an oil on canvas, on loan from the San Antonio Art League, is one of the interesting Texas Hill Country painting currently on display at the Blaffer Gallery. The exhibition, The Onderdonks, A Family of Texas Painters, will be held over through Homecoming weekend.

Technology includes new award in plans

Richard Lopez was named to head a temporary slate of officers at a recent meeting of the newly formed College of Technology Alumni Association.

Serving with Lopez until permanent officers are elected later this fall are Beckie Stover, vice president; Bill Young, secretary; Mike West, treasurer; and Russ Gundrum, Carl Glenn Skrabanek and Charles "Dave" Wilson, delegates to the Alumni Organization.

The Association was organized to "advance interest and promote the welfare of the College, foster the natural bond among alumni of the College, assist the College in carrying its obligations to students, faculty and alumni and to assist in providing adequate and dependable financial support for the College and for alumni activities."

Among the many important activities planned during the coming months are a 10 a.m. Saturday, Sept. 27 Homecoming brunch at the University Center honoring Margaret J. Post, the first woman to earn a Bachelor of Science degree in Technology at the University. Mrs. Post, who received her degree in 1969, will receive the first Distinguished Alumnus Award to be presented by the College of Technology Alumni Association.

Presently field service representative, product support, for McDonnell Douglas in St. Louis, Mo., Mrs. Post also serves as the corporation's field service representative to Ozark Airlines and TWA. She formerly held the position of Director of Engineering for Texas International Airlines. She is a member of Phi Kappa Phi Professional society and is listed in **WHO'S WHO IN ENGINEERING**.

Groundbreaking ceremonies for the new Technology Building are currently being planned and will be the second important activity to be undertaken by the new alumni group. A rendering of the building will be on display during an Open House at the College during Homecoming

weekend. The Hewlett Packard computer will also be available for testing skills at various games and another computer will record voice prints.

Dues going UP

Hurry, hurry, hurry. If you haven't joined the Alumni Organization or renewed your membership, don't delay.

Effective Oct. 1, dues are going up.

As with everything else in the current erratic economic picture, expenses are rising. And that includes keeping the alumni office running efficiently and effectively.

The month of September will

Olle's Corner

By Olle Lorehn

Would you like to travel to the South China Seas? Or take an overnight train trip to the North Texas State game in Dallas? How about a basketball tournament in Las Vegas.

These are just some of the many programs and activities coming up for UH alumni in the months ahead.

Would you like to help honor our athletes at a banquet? Over 500 of the alumni did last May.

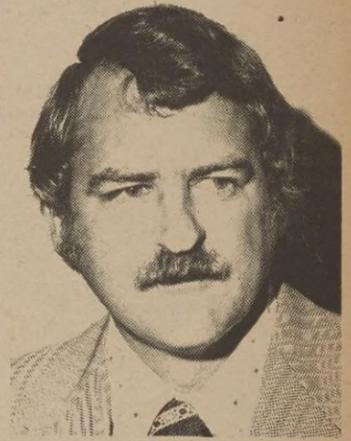

Want to meet head coach Bill Yeoman, see highlight films of last year's team and rap sports with members of the coaching staff? Last month over 200 alumni in area clubs throughout the state did just that.

How about a banquet to honor alumni and friends who have distinguished themselves in their careers? Last year over 650 alumni participated in a similar happening.

Your program and activities department stands to help you and your group to plan and execute and feasible activity you would like to have. We are constantly on the lookout for new and varied programs.

But we need your help.

How? First and foremost, we need to enlist more members.

LOREHN

The funds resulting from your membership dues support the Organization's communicative efforts which in turn support our programs. Next, you can help by actively participating in the programs offered by the Organization. And, most important of all, is you have any good ideas for an activity, give us a call.

For instance, would you like to travel to Mexico and study the art, culture and economic conditions of our neighbors to the South? Or is a trip down the Rhine River more your bag?

What about mini-trips to the Wursthfest, horse races in Louisiana or skiing in Colorado?

Would your sons or daughters like to attend football games and meet and practice with the team, or become junior supporters of our baseball team?

Will having a faculty member speak to your group give a big boost to one of your programs?

These are some of the questions I need answered in order to make plans for an interesting year. So if programs and activities interest you and they do me, drop by the alumni office, call or write.

Variety another name for Sundry School

From quilting to Greek folk dancing, hot air ballooning, mental cybernetics and basic Polish, Sundry School has it.

Open to anyone within the Greater Houston area, Sundry School offers a lengthy list of low cost non-credit courses to provide enjoyment as well as opportunities for self-improvement.

The Sundry School program is sponsored by the Campus Activities Department with course enrollment limited by the nature of the subject matter or the size of the faculty. Most of the classes are held on the UH campus.

A \$2 Sundry School registration fee is charged to register for any number of classes. Some classes have additional instructor's fees ranging from 50 cents to \$3.25 per class hour, plus materials expense fees. Payment of fees is by cash only.

Registration will be held Sept. 7-11 in the University Center. Classes will begin Sept. 29.

Persons interested in obtaining further details on Sundry School and its programs may call Judy Marko, assistant director and activities coordinator for Campus Activities at 749-1253.

Foundation elects slate

Three prominent Houston business, professional and civic leaders have been elected as key officers of the University of Houston Foundation (UHF).

Max Levine, former chairman of the board of Foley's, who has headed many community projects over the years, was named chairman of the UHF board, which exists solely for the support of the University of Houston. He will succeed Milton

R. Underwood, vice chairman of the board of Underwood, Neuhaus and Company, Inc.

Roy H. Cullen, vice president of Quintana Petroleum Corp., was re-elected president of the UHF during elections held last month. Cullen, a grandson of Hugh Roy Cullen, whose benefactions were critical in the early and continuing development of the University of

UH profs discover elusive particle

A pair of UH physicists, in collaboration with colleagues from the University of California at Berkeley has been cited for the discovery of a particle that eluded scientists during more

than 40 years of intensive searching.

Dr. W. Zack Osborne and Dr. Lawrence S. Pinsky, in concert with Berkeley's Dr. P. Buford Price and Dr. Edward K. Shirk,

concluded the existence of the magnetic monopole, a magnet with only one pole, in a two year research effort funded in part by a \$50,000 eight year grant from the National Aeronautics and Space Administration.

The monopole is a basic quantum of magnetism comparable to the electron in electricity and opens up a new world of matter and energy for scientists to explore.

The abstract of the revolutionary findings, "Evidence for Detection of a Moving Magnetic Monopole," was published in the August 25 issues of *Physical Review Letters*, a respected scholarly journal among scientists.

It was on the fifth of a series of balloon flights looking for ultra-heavy cosmic rays in 1973, that data was gathered for the project. The Houston aspect of the experiment then took over, consisting of observations which have thus far taken two years.

Locations of cosmic ray tracks were first completed in Nuclear Emulsion, a dense photographic-like material which is sensitive to ionizing particles. These locations were then examined in another film-like detector at the UH and in a plastic track detector at Berkeley. Heavy particles left residual tracks in the thin plastic sheets which were revealed by etching in a caustic solution.

Finds on one unusual track were put together. Alternates were canceled out until the only possibility remaining was a magnetic monopole with a magnetic charge of 137 and a mass more than 200 times that of the mass of a proton.

"If another one is found quickly," stipulates Dr. Pinsky, "there's a decidedly different physics going on than we know believe." He indicates that the monopole is possibly only one of a whole family of magnetic particles, a speculation to be borne out via future experiments.

Monopoles would also alter the Maxwell Equations, known by physicists as the basis of electromagnetic phenomena. They could answer the gap in reasoning left by founder J. Clerk Maxwell in 1865, a puzzling lack of symmetry in a world that theoretically ought to be in balance.

GO!

Architects announce fall lecture series

A 2:30 p.m. Tuesday, Sept. 23 lecture in Arnold Hall by Raimund Abraham, internationally known architect, planner, designer and author, will be among Homecoming Week activities presented by the UH College of Architecture. A display of his works will be shown during the entire week in Room 100Z.

Homecoming activities at the College will also include a Saturday, Sept. 27 Open House.

Speakers in the Fall-Spring series of lectures to be presented by the College include Richard Meier, Sept. 10; Paul Rudolph, Sept. 16; Abraham; Charles Moore, Oct. 21; Charles Gwathmey, Nov. 4; Michael Graves, Jan. 21; Suzanne Torres, Feb. 18; Peter Eisenman, March 26; Emelio Ambazz, April 8 and Colin Rowe on a date to be announced later.

The lectures will be offered free of charge in Arnold Hall.

A.A. White returns as law school dean

A.A. White, acting dean and professor of law at the University of Houston Bates College of Law, has accepted the appointment as dean of the College for a one-year term.

White, former dean of Bates

College from its inception in 1947 to 1956, accepted the acting dean post when John B. Neibel resigned the deanship to become special assistant to UH President Philip G. Hoffman. White's appointment was recommended by a search committee, which will continue its charge to find a permanent dean.

A graduate of North Texas State University, White holds a Bachelor of Science degree from that institution and an LLB degree from Southern Methodist University. He did graduate work in law at Columbia University.

Active in civic affairs, Dean White is chairman of the University Athletic Committee and a past chairman of Lawyer Placement and American Bar Association awards committee of the Houston Bar Association. He is also a past member of the State Bar Committee on Substantive Law Changes.

Widely known and respected by his colleagues, he has been active in landmark decisions concerning the fixing of responsibility for radiation injuries, the right of recovery for prenatal injuries and liability of cigarette manufacturers and assumption of risk. In 1971, he was involved with the legal question of damage remedy for victims of organized crime.

In announcing the appointment, President Hoffman said, "We are indeed fortunate to have a person of Dean White's stature to assume the deanship of Bates College. As the first dean of Bates College, Dean White brings to this sensitive position a wealth of experience and scholarship.

"The College has prospered under his leadership in the past, and I am confident he will bring renewed vigor to his office and to the faculty and students."

Houston, is also a major UH donor.

Elliott A. Johnson, prominent Houston attorney and former general counsel for Schlumberger, Inc., was elected vice president to succeed Levine Johnson, who currently heads the UHF Excellence Campaign, which is expected to raise more than \$2 million for the University. He is a former chairman of the board of South Texas College, and the Downtown College of the University of Houston.

UH alumni Don D. Jordan, president of Houston Lighting and Power Company, and John B. Van Ness, a partner in the architectural firm of Pitts, Phelps and White, and a past president of the UH Alumni Association, were elected UHF trustees for three year terms running through November, 1978. Jordan succeeds the late Carl B. Sherman, former chief executive of HPL. Van Ness takes the trustee post left vacant by John H. Burton, who moved to San Antonio after his Director and Consultant of Transcontinental Gas Pipe Line Corp. A graduate of the University of Houston College of Architecture, Van Ness has served two terms as president of the UH Alumni Organization.

Re-elected to new three-year terms through November, 1978 were Roy H. Cullen, Mayor Fred Hofheinz and Robert W. Kneebone of the Texas Commerce Bank.

Y'all get on board the UH-NTS special

The call "All Aboard" will signal the beginning of a overnight train trip for a limited number of UH alumni planning to attend the Oct. 11 UH-North Texas State game. Marty Evans will be tour director for the event.

The Cougar fans will depart the Houston Amtrak Station, 902 Washington, at 9:50 a.m. Saturday and pause in Brenham at noon to pick up additional UH for the trip north to Fort Worth. Upon their arrival at 4 p.m., the group will board buses for the Airport Marina Hotel, overnight headquarters, and later proceed to the Marriott Hotel in Dallas for the Dallas Area Club's pre-game cash bar party.

Buses will leave the Marriott for the Texas Cowboy Stadium in Irving at 7 p.m. After watching

the crowd-pleasing Cougars tame the Mean Green of Texas State, the group will return to the Airport Marina Hotel.

Sunday morning has been left open so that interested persons can tour the Dallas-Fort Worth Airport. Buses will depart at noon for the drive to the train station with the train arriving in Brenham at 5:30 p.m. and Houston at 8 p.m.

The entire cost of the trip, including game and train tickets, transfers and motel room is \$60 per person for Houston alumni and \$50 for those traveling from Brenham. Reservations and further information may be obtained by contacting the Alumni office, 4800 Calhoun, Houston, Texas 77004.

Editorial

A unique legislative proposal is now under consideration in Congress. Its subject: funding for public broadcasting. Its purpose: to provide that funding in direct proportion to what the American people are willing to pay locally for public broadcasting services.

No other federal legislation is quite like this proposal. But no other American institution is quite like public broadcasting.

Public broadcasting is a television and radio service designed to bring programs of high quality and diversity to All Americans. The name "public" suggests two things: that public broadcasting's mission is to serve the people, and that the people help to pay for it through individual contributions, tax dollars, and other channels.

One of public broadcasting's many sources of funds is the federal government. Federal money is received by the Corporation for Public Broadcasting - a private, nonprofit organization that was authorized by Public Broadcasting Act to facilitate the full development of non-commercial television and radio. CPB, in turn, makes its funds available to stations and other organizations in public television and radio.

The federal contribution to CPB is far from dominant in public broadcasting: It represents about 25 per cent of the money available to the entire service. But his support makes a critical difference in public broadcasting's ability to provide service to the American people.

For that reason, the role of the federal government in public broadcasting raises two important questions. Can the government help public broadcasting do its job more effectively without defeating that purpose by trying to control the service?

Can the American people - whose tax dollars make the federal contribution possible - be certain that the amount of that contribution is determined in a way that reflects the real worth of public broadcasting?

The legislation now before Congress would make it clearer than ever that both questions can be answered affirmatively.

The legislative proposal is called the public broadcasting Financing Act of 1975. It would accomplish its purposes in two unique ways:

It would distribute federal money to CPB according to a formula. The version being considered by the Senate would provide one federal dollar for every \$2.4 nonfederal donated to or invested in public broadcasting, up to specified ceilings. The House is considering a similar version that alters the ratio to 3 to 1 in the last two years.

It would approve the distribution of funds for a five-year period rather than one year at a time, so that public broadcasting would gain significantly greater insulation from the political process.

In addition, the bill would require that fixed shares of federal money be distributed directly from CPB to public broadcasting stations. (These shares would increase as federal funds increase.) Thus, the legislation would have its greatest impact in local communities, which are the heart of public broadcasting.

The legislation would not deprive Congress of the ability to account for the expenditure of its funds. Periodically, it would review the performance of the Corporation for Public Broadcasting. But there would be no interference with the sensitive program process of public broadcasting.

It would insure that the federal government will not become public broadcasting's principal source of funds, because the "matching" formula requires that most funds come from other sources.

It would allow public broadcasting the planning time necessary for first-rate programs.

Federal support would be tied to public broadcasting's demonstrated effectiveness, because the support would be determined by an impersonal formula. Public broadcasting would not receive one nickel under this legislation that was not "earned" by raising 2.5 times as much nonfederal support.

The federal support under this legislation would not be open-ended. The bill places ceilings on the amount that the government can appropriate in any one year.

There are different views of what the appropriate ceilings ought to be. Public broadcasters have recommended, and many in Congress have supported, ceilings that begin at \$88 million in 1976 and increase to \$160 million by 1980. The White House version of the legislation begins at \$70 million in 1976 and rises to \$100 million by 1980.

As one of those who benefits greatly from the excellent programing broadcast locally by our own KHUT-TV, Channel 8, this editor strongly urges each reader to make his or her feelings known.

President's message

By J. Huey O'Toole
Fellow Alumnus,

You may receive a letter from one of the Past Presidents of the Alumni Organization asking you to become a life member. If so, I hope you will respond and we can add your name to this list. Life Memberships are payable \$100 per year for 10 years; \$200 per year for 5 years; \$250 per year for 4 years; or \$1000 in full.

This elite group of loyal alumni have become Life Members and found a meaningful way to support our University with a lasting contribution to the Alumni Organization Capitalization Fund.

Directions

By David Rockoff
Executive Director

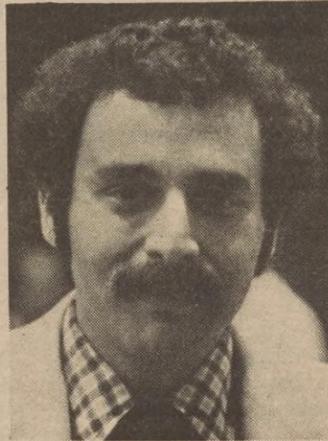

DIRECTIONS, the title I have given to this monthly column, refers to the new approach the Alumni Organization is taking to build a strong alumni base of support for the Organization and the University.

I began my first day at the University by taking a tour of the campus. The campus has become a well planned facility composed of new buildings, designed for the specific use of the various departments they house. Interspersed among the buildings are quiet green parks that contain seating areas and works of art. Several plazas containing reflecting pools and fountains help make this an oasis for the purpose of education, and research. What the University has accomplished in the past 15 years provides a guideline for the future growth of the Alumni Organization.

It is now two months since that first day and we have just begun to scratch the surface of the changes that will be coming about in the alumni area. The office staff has been reorganized into specific departments dealing in record keeping, production, publications, administration, alumni programs and planning.

One of the first changes to be made is the complete computerization of the alumni record keeping system. Computerization is going to be a time consuming task requiring several months to effectively complete. I ask that you bear with us while we undertake this project. If something is incorrect pertaining to your record, please notify us by mail. Your input will assist greatly in establishing a better system.

This publication is the first full run newspaper produced by the Alumni Organization in many years. The initial issue is being mailed to 55,000 alumni; future issues will be mailed to those

ROCKOFF

who are dues paying members of the Alumni Organization and a small group of other alumni to acquaint them with the Organization and its benefits. Your membership will insure your receipt of a copy of every issue of The EXtra.

On October 1, the dues structure of the Organization will change. By joining this month, or renewing your membership during the month of September, you can take advantage of the current dues. A membership form explaining the various dues rates and benefits offered by joining appears elsewhere in this issue of The EXtra for your convenience.

In the coming months, you will be receiving information about interesting new activities to be sponsored by the Alumni Organization in conjunction with the alumni associations of the various colleges at the University. Their programs will be social and will also offer opportunities to participate in the alumni continuing education program currently being developed in conjunction with the deans of the colleges and the College of Continuing Education.

Things are going to be hectic but we are all prepared to do the work. We ask you to lend your support by joining the Alumni Organization and participating in the activities offers.

Classes open at Woodlands

Limited course work will be offered this fall in The Woodlands in response to increasing requests for such instruction since the formal opening of The Woodlands last October.

Graduate and upper division courses in business administration and in education will be taught in the rapidly developing North Harris County-South Montgomery County area. Requests for advanced educational opportunities at The Woodlands emphasized these and related fields of study, and directly influenced University planning for course offerings. Continuing reviews of educational needs in The Woodlands, 30 miles north and west of downtown Houston, are also being made.

President Philip G. Hoffman has appointed Stewart D. North, professor of education at the UH Central Campus, to direct the program in addition to his other duties.

Persons interested in further information may inquire at the office recently opened in the Wharfside Professional Building P.O. Box 326, Woodlands, Tx. 77373 or call, 367-3212.

ALUMNI AROUND THE WORLD

By Bill Roberts

Onward and Upward: RICHARD L. MELTON, who got his BBA in accounting, is a new vice-president of Texas Commerce Bank ... And UH infiltration into banking continues on all fronts: JOHN CARLEVARO was upped to assistant cashier at Cypress Bank ... Gorgeous SALLY KATHLEEN ANDERSON, who took her BA at the UH, won her wings with Delta Air Lines. She's a flight attendant now ... JAMES W. ALLBRITTEN, who got both BBA and MBA degrees here, was promoted to sales manager of Lennox Industries Inc., Southwest Division, based in Fort Worth ... Alum W.DAVID HANKS joined Riviana Foods, Inc., as manager of Internal Audit ...

L.G. CLINTON III ('73) joined the United States Attorney's office in Houston ... UH alumni ALBERT H. KORENEK is worth a full feature yarn: A class assignment (researching a small business) led him into the growing of trees for sale -- and the invention of Vermeer-type hydraulic 'diggers, which he calls his "Dream Machine." A contract with Vermeer Manufacturing Co., allows Vermeer to build and sell Korenek's hydraulic tree digger as their "Tree Spade" ... WILLIE CALHOUN has been upped to assistant professor of speech and Black Studies at Washington State U. Calhoun, a playwright - actor - choreographer-director, recently presented his first original production, "For My People" at WSU ... CHRISTOPHER H. KITCHEN is now a full-time faculty member at Morehead State University, serving as an assistant professor of accounting ...

WILLIAM C. FINCHER is new manager of projects of the Omaha office of Gibbs & Hill, Inc., New York ... MICHAEL ADLONG, who got his BA at the UH, received his Master of divinity degree from New Orleans Baptist Theological Seminary ... MARCIA ABMEYER, of Hartford Insurance Group's Houston regional office, was one of 31 participants in a seminar at the home office in Hartford, Conn. ... DR. THOMAS H. AYRES of Houston was appointed to the state directorship of the Texas Optometric Extension Program. Dr. Ayres got his BS and OD at the UH, and has been working on his master in Physiological Optics ... HERBERT A. ENGELKING was promoted to manufacturing manager for Long Reach Manufacturing Division of Anderson, Clayton & Co. in Houston...

Alumerrigoround: DR. HENRY T. WEATHERS is new chairman of accounting and electronic data processing dept. at Texas A&I University ... UH grad MICHAEL J. PIERI, vice-president and treasurer of Houston Natural Gas Corp., was elevated to the board of trustees of the Houston Foundation for Accounting Education ... THOMAS B. HARRISON ('73) has been named a professional

services associate in the professional services associate in the professional relations and services division of Eli Lilly and Co. ... UH grad JUDITH ANN WOLFE got her MD degree at Medical College of Pennsylvania May 24 and has begun a clinical graduate program at Bryn Mawr Hospital ... J.L. BURGHARD ('5) joined the Copeland Group in Illinois as vice president, engineering ...

LOUISE E. COHEN, JR., got his Master of Science degree at Niagara University, NY, at May 25 ceremonies ... VICKI SCHMID, who is in Who's Who among Students in Universities and Colleges (she's majoring in English at the UH), is serving as regional aide for Gamma Chi Chapter of Gamma Sigma Sigma at Southwest Texas State U. at San Marcos ... DONNA R. TOBIAS, who got her MA in speech at the UH and who is speech and drama instructor at Texas A&I, gave her paper, "The Oral Critique in the Evaluation of Oral Interpretation," at the 45th Southern Speech Communication Association Convention at Tallahassee ...

KERRY ROCK, who got both BS and MS in chem engineering at the UH, has joined the chemical process engineering department of Rohm and Haas Co. in Philadelphia ... THOMAS DAVIS LISK (MA'72) was one of 88 receiving Ph.D. degrees at Rice University in May...

THOMAS B. IRWIN ('56) was promoted to assistant treasurer and assistant secretary of Panhandle Eastern Pipe Line Co., in Houston ... GEORGE WHITE, JR., department chief of Western Electric Co. at Lee's Summit, Mo., was the sixth person to participate in the current Black Executive Exchange Program lecture series in Personnel Administration at Bishop College, Dallas ...

ALLEN W. CECIL is new district engineering manager of the Midcontinent Production Division, Andrews District, for Exxon Co., USA...

EARLE B. HAMMOND, UH grad, is new manager of plant accounting for National Supply Co., division of Arco Steel ... RONALD M. GASWIRTH, who was a UH frat prexy and Chief Justice of the UH Student Court, was named new U.S. Department of Labor regional solicitor, heading a staff of 13 attorneys in Dallas. He graduated from the UH Law School ...

We help people communicate.

Notable alumni

elected to a three year term as a trustee of the University of Houston Foundation.

Pollock, an Alaskan homesteader in the late 1940's and early 1950's, received a Doctor of Jurisprudence degree from the University in 1955 and a Master of Science degree in industrial management from M.I.T. in 1960. He served with the U.S. Merchant Marine in 1936 and 1937 and in 1941 enlisted as a seaman in the U.S. Navy, retiring in 1946 as a lieutenant commander. He is the only Alaskan and the only living American to serve in a territorial legislature, state legislature and the United State Congress.

In his present assignment, Pollock serves as Director of the Commerce Department task Force on Law of the Sea and is a member of the U.S. delegation to the internal Law of the Sea Conference, committee representative on the Executive Committee of the National Security Council interagency LOS Task Force and numerous other positions. Most recently, he Sen. Lowell Weicker of Connecticut, Arkansas Cong. Bill Alexander and Bob Wicklund of the Perry Foundation lived for three days in a underwater habitat on the ocean floor 50 feet below the surface off Freeport, Grand Bahama Island. The three legislators became the first members of Congress to become qualified NOAA aquanauts.

Mrs. Ebaugh, who was named to Emeritus status when she retired in May from the UH English department, was hired in 1930 when the University was a junior college meeting at night in Sam Houston High School. After the campus moved to its present location, she taught English, was appointed chairperson of the department and served as dean of women from 1955 to 1970 before returning to full-time teaching.

Her many accomplishments include helping to organize campus chapters of Phi Theta Kappa, Alpha Lambda Delta and Mortar Board honor societies and a university branch of the American Association of University Women. Mrs. Ebaugh has also served as president of the Texas Association of Women Deans and Counselors and chairperson of the past Committee on Financial Aid. She is a recipient of the Matrix Award from Women in Communication, Inc. and is listed in Who's Who Among American Women and Who's Who In America.

MITCHELL

The second recipient of this year's President Award, L. Standlee Mitchell, is known to many former students as "Chief." Joining the UH faculty in 1933, he served as chairman of the Drama Department and as Dean of Men and was named to emeritus status last year upon his retirement as Associate Professor of English.

Comedy to open theatre season

Five productions, ranging from the musical to the mystical, will highlight the UH drama department's 1975-76 season.

"Hot L. Baltimore," an offbeat comedy about the model residents of a decaying structure, will play Oct. 14.

The smash musical based on the adventures of Don Quixote, "Man of LaMancha," will run Nov. 19-22. Dr. Sidney Berger, chairman of the drama department will direct the play "Caligua," a drama by Albert Camus will be presented Feb. 24-28 under the direction of Dr. Berger.

A new musical adaptation of "The Fall and Rise of Bertold Brecht," executed by director Berger, is set for April 7-10.

EBAUGH

Prior to beginning his career on the university level, Mitchell served as an elementary and high school principal and as a high school teacher.

Tickets to the annual banquet are \$15 per person, \$30 per couple and \$150 for a table of 10. They may be reserved by calling Nancy Fowler at the Alumni office, (713) 749-2242.

The fifth production, Mark Twain's "Huckleberry Finn," is the department's annual children's offering. Julie Rozan will direct the classic planned for April 29-May 1.

Further information and ticket reservations may be secured by phoning the UH Drama Department at 749-4708.

Efficiency expert. Natural gas is the most efficient energy source for heating, water heating, cooking and clothes drying in your home. Use it wisely, and help us make a good thing last.

BAYOU BUILDING

Building opens on CLC campus

Student returning to the Clear Lake City campus on Sept. 8 will be attending classes in the recently completed Bayou Building.

And they'll be enjoying the new structure for its beauty as well as its modern classrooms, faculty offices and enormous third floor library.

The exterior of the building is a treated aluminum and tinted glass which give a dark, almost black, appearance. The interior, by contrast, is light with an open airiness that brings the surrounding forest areas right inside. In addition, to the glass walls of the facade, there is a three-story glass-roofed atrium boasting a circular planting area 30 feet in diameter filled with tropical trees and small plants. Benches strategically placed around the 10,000 foot, tile-floored atrium offer students relaxing spots from which to enjoy the restful area.

Glass walls surrounding the new library bring nearby treetops into full sight and the interior walls, opening onto the atrium's glass roof, add to the continuous feeling of sky and freedom.

The glass walls of the first floor cafeteria also afford a view of the forest area.

Included in the plans for the new building were many comfort and safety facilities such as emergency rooms located next to the elevator on each floor. Oxygen and first aid are available for those in need. Coin lockers for storage and pay telephones have been provided in the entrance room of each lounge-rest room.

Many of the interior walls are finished in attractive natural oak paneling and bright colors, such as red and orange, are used on painted walls. Carpeting is muted in tone to blend with any furnishing or wall color.

Faculty members will be clustered in office suites. Each of which will have a reception room, offices, a private discussion area for conferences and counseling and a workshop with duplicating facilities.

Classrooms will accommodate from 16 to 101 students. In addition there are a number of conference rooms to be used for special meetings and lectures.

Slated for completion in early 1976 is a 500-seat auditorium where both musical and drama events and lectures and symposiums can be presented.

The Arbor Building, which formerly housed classes on the CLC campus, will now be the location of the book store, Student Services, a laboratory for the applied arts and the pre-primary school.

Alumni add two to staff

David Rockoff, an alumnus of the University of Houston was named this summer to the post of Executive Director of the UH Alumni Organization. He will be assisted by Olle J. Lorehn, who will serve as program and activity coordinator.

Rockoff, a native of Denver, Colorado who has resided in Houston for 23 years, was graduated from Jones High School and received his Bachelor of Business Administration in 1968. He served as Director of UH Alumni and Athletic Development from 1967 until 1969 when he entered private business.

Lorehn, a graduate of Lamar High School, Houston, attended the University of Texas and South Texas Junior College before enrolling in the University of Houston where he was active in a number of campus activities. He is the owner and operator of the O.J. Lorehn Ranch in Waller County and a partner in the 525 Heights Co., specializing in the building and management of apartment units. His professional background also includes the editing and publishing of advertising rate books for the media.

Upon returning to the University campus this July, Rockoff set an effective communication program as one of his primary goals.

"I feel strongly that the Alumni Organization must keep its members informed on both what is happening at the University today and what its future will be in the area of higher education. By so doing, the alumni can support UH through participation not only in its athletic programs but in campus activities as well, especially in the academic area.

"Through such first hand information, the long range result will be the building of substantial financial support to our University."

GRETA beginning another busy year

This month the Gulf Region Education Television Affiliates (GRETA) will begin its 11th year of providing instructional television to schools in the Gulf Coast area.

Planned and coordinated to provide in-school telecasts to some 365,000 kindergarten through 12th grade students, GRETA broadcasts five days weekly through the facilities of KUHT-TV, Channel 8.

The current schedule extends from 8:30 in the morning to 3 p.m., offering programs for every grade level. Subjects range from phonics to physics, from language arts to career education, from math and science to history, geography and economics. Music and auditory and visual training are included along with the exploration of the third world and the media machine. Each program lasts for 15 to 30 minutes with those designed for junior and senior high classes repeated six times each day to accommodate the various schedules of the 55 participating public, private and parochial school districts.

An auxiliary enterprise of the University of Houston, GRETA consists of an autonomous organization of superintendents who represent their districts and GRETA staff at Channel 8.

Participating districts indicate the areas of curriculum in which television could be used most effectively to enrich and improve instruction. Detailed planning is then done by groups of administrators, content specialists and classroom teachers who assist in the selection of curriculum materials.

If series which meet the curriculum needs are available through video tape libraries, they are leased. If no suitable

Clubs planning flight to game

The San Antonio and Austin Area Clubs will team forces on a trip to the Oct. 11 UH-North Texas State game, according to Chester "Buddy" Barnes and Robert Kelly, coordinators for the event.

Members of the clubs - will fly from the San Antonio Airport at 2 p.m. that day via southwest Airlines. At Love Field in Dallas, they will be met by limousines for the drive to the Marriott Hotel and a pre-game cocktail party - reception sponsored by the Dallas Area Club. Air conditioned buses will transport the group to the game at the Texas Cowboy Stadium in Irving and back to the Marriott for a round of parties and greeting Cougar classmates and old friends.

After a restful night at the hotel, the party will fly back to San Antonio with an ETA of noon.

Further information concerning this exciting weekend package may be obtained by contacting either Barnes at (512) 342-6214, Kelly at (512) 476-7658 or the Alumni office.

programming is found, the curriculum committee outlines the entire series as to purposes, content and outcomes for local production.

One of the major concerns of the GRETA staff is the preparation of study guides. Television programs in each series are described in order to state clearly their instructional purposes, methods of teacher and pupil preparation, general content and suggested follow-up

activities. In addition, GRETA offers further services through workshops, faculty meetings, conferences with individual districts and special programs to improve the uses of the instructional series.

Membership in GRETA is available to any school district in the 23 counties receiving the Channel 8 signal at a cost of 50 cents per pupil per year, a sum matched by the Texas Education Agency.

Pharmacy to note 25th anniversary

The College of Pharmacy will honor members of its first graduating class during the 1975 Homecoming celebration.

A special 25th anniversary observance has been planned during the 11 a.m. to 2 p.m. open house to be held on Saturday, Sept. 27.

During the open house,

laboratories will be open and special demonstrations will be arranged to allow alumni to observe ongoing research and student experiments.

College and campus tours will also be conducted by members of the pharmacy fraternities and other professional organizations.

Education forms new alumni group

Election of officers and adoption of by-laws will highlight the 7:30 p.m. Sept. 10 meeting of the newly reorganized College of Education Alumni Association.

Discussion on the group's participation in the Sept. 27 Homecoming activities and an intensive fall membership drive are also on the agenda.

All alumni of the College are urged to attend the next meeting to be held in Stephen Power Farish Hall, home of the College of Education.

Attitude important, says coach

By Bill Yeoman
Head Coach

Before play actually begins in September, it is extremely difficult to forecast how well a

football team will play that season.

Frame of mind, impossible to predict and very important to winning, is the key.

An accurate assessment of a team's frame of mind becomes

even more difficult when you have a young team. That's the situation we are in this fall at the University of Houston.

We have a young team, short on depth, but with enough returning players, especially offensively, to give us a chance to have a decent team.

Our spring work was heartening. The enthusiasm and effort were excellent. The competition we had helped everyone improve. It was imperative that we had the hard work because we do have such a young team.

There's no question that we are improved at quarterback over a year ago. We went into last season with no experience at quarterback.

Bubba McGallion, who we had planned to red shirt last fall, came off the bench and improve consistently right through the Astro-Bluebonnet Bowl game. He will be our quarterback.

John Housman of Killeen returns at fullback and is a really strong threat inside. We moved Donnie McGraw back to running back in the spring. He has the potential to be a outstanding back.

Our receivers are adequate. We have Robert Lavergne, Eddie Foster, Frank Scalise and Don Bass, the top four from last season's team, all returning.

Up front we have Everett Little (265) and Val Belcher (245) both running at guards. Little, a 265 pound senior, has been an offensive starter for a year and a half after spending his entire high school career and his freshman year at UH as a

defensive player. His continued improvement offensively will mean a great deal to our offense. Belcher is just a junior, but already has started two years and shows promise of becoming one of the best we've had.

David Brooks (280) returns at right tackle. Sophomore Kevin Rollwage (240), a red shirt last season, will be starting his first season.

Mike Spradlin, a junior from Dallas, will be starting for the first time in his career.

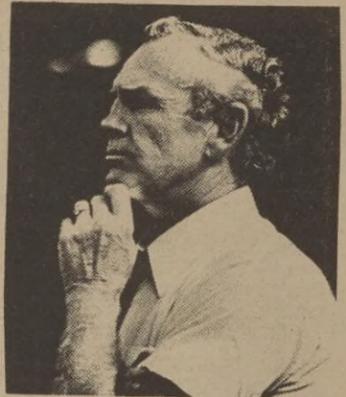

Overall, we are very short in backup men in the interior line. If the returning players can stay healthy and continue to improve, we could have a respectable offense again this season.

However, you must remember that Little will be the only senior in the line, McGraw is the only senior in the backfield and Scalise the lone senior among the receivers.

The defense is much younger. Safety Joe Rust will probably be the only senior starter. Six players will be beginning their first season as starters and another position is still a question mark.

Wilson Whitley will be back at tackle. We are hoping that Lee Canalito will be able to return with him. Lee missed spring practice because of knee trouble. A healthy Canalito would certainly improve our defensive unit. Whitley could be a Lombardi Award candidate.

Guy Brown, at one end, played some last season. His pass rush looked promising in the spring.

YEOMAN

Ross Echols, a sophomore still has a long way to go on the other side of the line, with time should be a good one.

Linebacker Paul Humphreys came off of the bench last season as a sophomore and starter the rest of the year. He will be flanked by two first year starters, Reid Hansen and Willis Williams or Kenneth Perry or Vincent Greenwood. The progress that these linebackers make will determine how effective our defense will be.

While Rust is one of two regular back from last season, Gary Drake, the strong safety, did start a game last fall to replace an injured man.

The other returnee is Mark Mohr, a strong safety last year that we moved to corner in the spring. Mark was the team leader in pass interceptions last year with four.

The other corner could be Anthony Francis, Bennie Hill or John Llaoa. Llaoa is a senior who has not lettered. The other two are red shirt sophomores.

Our kicking game should be improved with Ken Pridgeon handling the punting and Lenard Coplin doing the place kicking. Both of them are juniors with a year's experience.

To further complicate the problem of maintaining a good frame of mind throughout a long season for a young team, we will have three open dates this fall. Our attitude and work habits must be positive from the opening of fall practice. Anything less will not allow this young team to overcome its lack of experience.

Prospects inked for track team

University of Houston Women's Track Coach Nancy Laird has signed three more top prospects to Cougar scholarships.

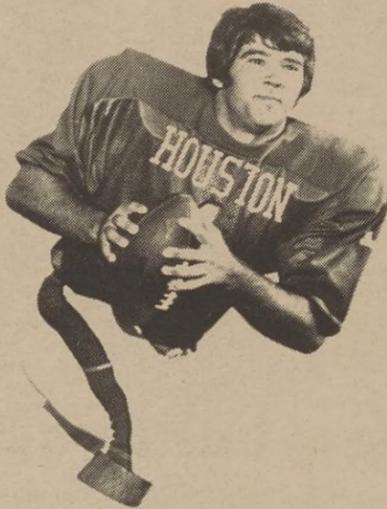

They are Sharon Fitzgerald and Donna Shell of Kettering, Ohio, and Lynn Louat of Lincoln Park, Michigan.

Fitzgerald, 19, placed fourth in the 880 yard run at the All-America High School meet in Des Moines, Iowa. Her best time is 2:15.

Shell has posted an 11:34 clocking in the two mile run. Louat, 18, was second in the Michigan girl's state high school two mile run.

She was also the first girl to qualify for the varsity cross country team at Lincoln Park.

Coach Laird previously signed Dianne Mull, a 2:16 half miler; and Joy Taylor, who has marks of 25.5 in the 220 yard dash and 18-6 in the long jump.

McGALLION

UH team will host cross country meet

University of Houston Cross Country Coach Johnny Morriss has announced that the 1975 Southwest Conference championships will be hosted by UH, Nov. 10, at Glenbrook Golf Course.

Morriss will be starting his 21st year as UH cross country coach. His teams have compiled a fantastic record of 114 wins and just 22 losses during that time.

Lettermen Wayne Brennan, David Brennan, Tom Birch and Brad Rickman are expected to be the top returnees for the 1975 season.

Australian Jeff Thompson is the squad's outstanding newcomer.

The 1975 schedule:

Sept. 20 - LSU Invitation at Baton Rouge, La.

Sept. 27 - McNeese Invitation at Lake Charles, La.

Oct. 4 - Rice Invitation at

Houston Oct. 10 - UT Invitation at Arlington

Oct. 25 - UH Invitation at Glenbrook GC

Nov. 1 - USL Invitation at Lafayette, La.

Nov. 10 - Southwest Conference championships at Glenbrook GC

Nov. 17 - NCAA District championships at Austin.

MORRISS

Fair warning, first come....

University of Houston season ticket holders for the 1975-76 season will have first priority on tickets for the first annual Southwest Conference post-season basketball tournament.

Each Southwest Conference school will get an allotment of 1,000 tickets for the championship tourney in March. This season's tournament will be at Moody Coliseum in Dallas.

The 1976-77 tourney will be in Houston. Ticket buyers for this season's tourney will have an option for next year's tournament.

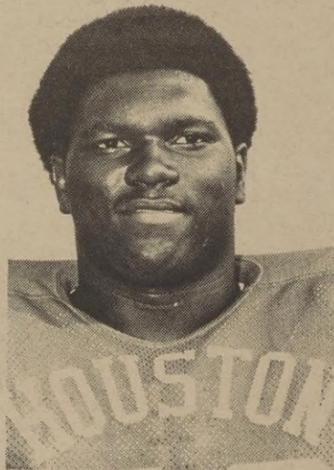

Juniors elected team co-captains

For the first time in UH history, a pair of juniors have been elected co-captains of the football team.

Wilson Whitley, a junior from Brenham, and Paul Humphreys, a junior from El Campo, will lead the 1975 Cougars.

Whitley, a 265-pound defensive tackle, has been a UH starter since he was a freshman. He was named to the freshman All-America team and received honorable mention All-America last fall.

Very quick for his size, Whitley should also be among the nation's top candidates for

WHITLEY

the Lombardi Award this season.

Humphreys got his chance to break into the veteran varsity lineup last fall in the Virginia Tech game when linebacker Harold Evans was sidelined with an injury. He was a starter the rest of the year.

Whitley ranked fourth on the team in tackles last season with 47 tackles and 38 assists. Included in his tackles were six quarterback sacks, second highest total on the team.

Humphreys had 87 tackles to rank third, even though he played very little in the first three games of the season.

HUMPHREYS

- 1975 UNIVERSITY OF HOUSTON FOOTBALL SCHEDULE

 - Nov. 29 - Tulsa at Astrodome; 7:30 p.m.

Counselor named to aid disabled

As part of the University's continuing efforts to assist handicapped students, Jan Henrie Fry has been named career counselor for disabled students.

The position was made possible through a federal grant aimed at expanding and developing programs for the University's severely disabled.

Career counseling is one of several services being offered to handicapped students during the

Dallas hosting pre-game party

The Dallas Alumni Club is inviting all alumni to attend its 5:30-7 p.m. Oct. 11 pre-game party (cash bar) at the Marriott Motor Hotel prior to the UH-North Texas State contest.

In addition, the club is offering a special \$10.50 package that includes a ticket to the game and bus transportation to and from the Texas Cowboy Stadium in Irving.

Checks and reservations must be made no later than Sept. 15 with Mickey C. Shyrock, 2001 Bryan Tower, Suite 2655, Dallas, Texas 75201. Further information may be obtained by calling Fred Gentile, (214) 351-5588 or (214) 488-1818.

1975-76 academic year. Emphasis will be placed on preparing students for employment through individual and group counseling concerning job opportunities and interviewing techniques.

The program is also intended to acquaint the Houston business and professional community with the University's Placement Center resources as well as to provide a liaison between employers and prospective employees from the University of Houston.

Important to the program's success are the participation of students seeking part-time or career opportunities and the employers' willingness to hire qualified handicapped employees. The service will assist the employer concerned with complying with the Rehabilitation Act of 1973, concerning non-discrimination against the handicapped.

Ms. Fry, married to Houston attorney Theron E. Fry, received her undergraduate degree from Wichita State University and her law degree from SMU. She is licensed to practice law in Kansas and Texas and is a member of the Kansas and Texas State Bar Associations, Trial Lawyers Association and the American Bar Association.

Golfer makes All American

Uh golfer Keith Fergus was named to the 1975 All-American collegiate golf team for the second year in a row.

The senior from Killeen joined Wake Forest's Curtis Strange and Brigham Young's Mike Reid as the only two repeaters from the 1974 squad.

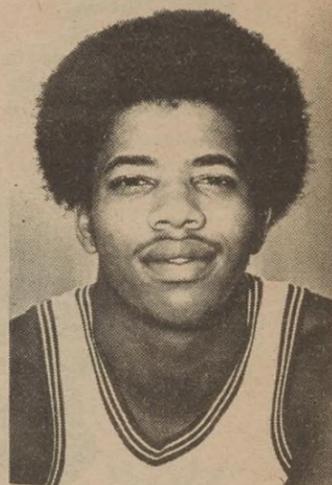

Birdsong slated for fall games

University of Houston basketball star Otis Birdsong will be a member of the United States Pan American Games team this fall.

The 6-4 junior from Winter Haven, Fla., has been competing with the U.S. team this summer in a special series of games with European teams.

Birdsong, the nation's 15th leading scorer as a sophomore last season with a 24.6 average, was also voted the team's co-winner of the most valuable player along with Louis Dunbar.

"The Bird," who already has scored 1012 points, is the first UH player ever to score more than 1000 career points by the end of this sophomore season.

BIRDSONG

Clear Lake honors summer graduates

Seven degrees, two Masters and five Bachelors, were awarded on Aug. 8 by the University of Houston at Clear Lake City following the close of its summer session.

Summer graduates receiving their degrees from Chancellor Alfred N. Neumann included

Sandra K. Ravet, Pearland, M.S.; Terry Kitchen James, Clear Lake City, M.B.A.; Susan Rourke Brignac, Friendswood, B.S.; Cathryn Brynjnes, Clear Lake City, B.A.; Sharion Richards, Dickinson, B.A.; Gladys Spillar, Texas City, B.A.; and Etienne Delphin Thebaud III, Houston, B.S.
