HOUSTON NEGRO HOSPITAL
Heating System

Dr. J. W. Slaughter,
618 1/2 Milam Street,
Houston, Texas.

Dear Dr. Slaughter:

Regarding the excessive quantity of
natural gas being used at the Hospital:

The gas companies maintain service de-
partments to handle matters of this kind for
their customers; hence, I would suggest re-
porting the matter to them and requesting they
send an expert to inspect the furnace and
submit recommendations in writing on this and
a regulator or thermostat system that will
automatically maintain an even temperature.

After receiving this, using your judg-
ment about submitting to others for advice ,
or adopting the suggestions.

Yours truly,

(Sgd) J. S. CULLINAN
