TO ALL EMPLOYEES

The display case contains five items: a "trouble" light, a set of auto seat belts (installation included), a hand fire extinguisher, a family first aid kit, and a pair of life preservers. Given your choice, which one would you choose? Next week, we'll follow the five winners to the display case, find out which items they selected - and why - and show some pictures of our winners.

In the future we'll have more drawings as more new Safe Workers are added to our elite group....So work safely.... always.

JET FUEL USE TO INCREASE

The advent of large supersonic jets in the early 1970's is expected to push the annual consumption of jet fuel from the present total of about three billion gallons to more than 4.5 billion gallons.

By 1975, supersonic jet transports are expected to create a demand for an additional 2.9 billion gallons of jet fuel per year, according to a current estimate reported by the American Petroleum Institute. These estimates do not include subsonic jet airplane fuel or any military usage.

A steady decline in non-jet airplane gasoline usage is forecast for the 1960-1970 period. This decline will be more than offset by a rapid increase in consumption of jet fuel, which is composed principally of kerosene.

Today's long-range jet planes use about 2,250 gallons of fuel every hour in the air. By the 1970's, a supersonic jet may fly at three times the speed of sound and may consume 14,000 gallons of fuel in a single hour of flying.

(Over)

CLEVE O'TOOLE (1.), Fire & Safety Dept., points to display of safety items being given to Refinery "Safe Workers". At the right is G. B. Dunn, Engineering Field Dept.

FIRST FIVE WINNERS NAILED FOR PRIZES IN SAFE WORKER CONTEST

The first five winners have been chosen in our Safe Worker "bonus" contest. A drawing was held yesterday in the Cafeteria, with all silver dollar winners in our Safe Worker contest eligible to win. To date there have been 50 Safe Workers noticed by our Mystery Man, and each one has already received a silver dollar for his safety work habits. Now, as an added bonus, each member of this group had his name in the box for yesterday's drawing. The prizes were the safety items that have been on display in the two large cases located in the Cafeteria and the Clock House. The winners get their choice of one of the items in the case.

....And here is our first group of winners:

- R. W. WOODS
- W. W. WEST
- BILL COWGILL
- J. DENLEY
- A. F. SARTOR

COMMUNITY EVENING SCHOOL ANNOUNCES FALL TERM SCHEDULE

The Pasadena Independent School District's Community Evening School (Adult Vocational Division) has announced its schedule of business and trade classes for the Fall 1963 term. Included in the list of courses offered are Shorthand, Business Machines, Typing, Bookkeeping, Business English, Blueprint Reading and Sketching, Basic Electricity, Basic Electronics, Basic Instrumentation, and General Refining Practices. Classes begin on September 24, and October 1.

All classes meet in the Vocational Building at Pasadena Senior High School. Registration begins September 9 in the Vocational Office, and continues through September 24, from 3:00 a.m. to 4:00 p.m., Monday through Friday, or you may register on the night of the first class meeting. For more information call L. P. Card, Director, Vocational Education, GR-3-4417.

GASOLINE PRICES DOWN....TAXES UP.... THAT'S STORY OF LAST 10 YEARS

In the last 10 years, gasoline prices have decreased 4%....but gasoline taxes have increased 39%. These facts and other interesting data is included in a new leaflet now available in the lobby of the Main Office Building and at the SHELEGRAPH news stand in the Cafeteria. The leaflet shows once again that.....GASOLINE'S A BUY....ONLY THE TAX IS HIGH!
